Lancaster Farming

Vol. 17 No. 26 | Lancaster Farming, Saturday, May 20, 1972 | $2.00 Per Year

We Salute Dairying June 3

Dairying is approximately a $45 million a year business in Lancaster County, Pennsylvania's most productive agricultural county. Dairying is also important in neighboring counties.

Lancaster Farming will recognize the area's dynamic dairy industry in its June 3 Special Annual Dairy Issue.

Lancaster Farming extends a special invitation to dairy groups and organizations, as well as individuals, to submit articles and news on dairying for the Dairy Issue.

Advertisers are invited to make their own appeal to a large segment of the Southeastern Pennsylvania dairy market.

To be sure to make the Dairy Issue, please submit all material by Wednesday, May 31.

Call us at 394-3047 or 626-2191 (ask for Lancaster Farming). Or write to Lancaster Farming, P.O. Box 266, Lititz, Pa. 17543.

Reminder on Hiring Youth for Farm Work

Many farmers are now hiring or soon will be hiring youth for summer employment.

Farmers are reminded of the necessity for youths under 16 years of age to have secured a special operators license which enables them to operate and work around machinery and equipment. These permits are obtained by taking a course available through local vo-ag departments at the local schools or through the local Extension office, where offered.

The license is your protection if an accident should happen to the youth while working on your farm. You, as the employer, are in violation of Federal law if employing youth without first being trained for hazardous occupations.

local Extension office, 1383 Arcadia Road, Lancaster, 394-6851, or the vocational agriculture department in your school district.

County FFA Chapters Hold Contests Prior to FFA Week

Working as a team, Merv Bruckhart (left) and Richard Kauffman captured first place for the Manheim FFA team in the Small Gas Engines Contest at Elizabethtown Area High School last week. Here they reassemble an engine, being judged on speed and accuracy.

Lancaster County FFA Chapters have been busily preparing and competing for the right to represent Lancaster County in various contest areas when FFA Week at Penn State rolls around June 28 to 30.

Girls as well as boys have been engaged in seeking the honor of representing their particular Chapter in the State Contest, and hope to continue on to National contests.

Three contests were held within the past week. It was a week full of anticipation, often surprises, and occasionally disappointment, as many youth found there were still many areas to be explored in depth until another year rolls around and new contests are held.

Gas Engine Event

The Manheim Central FFA Chapter small gas engine team won the area FFA contest at Elizabethtown last Friday.

The team members were Richard Kauffman and Merv Bruckhart.

Six teams participated in this years competition. Other teams were· Cloister Chapter, second; Elizabethtown Chapter, third;

Roger Lehman

A Youth Certain of his Future

This is the time of year when high school seniors must look into the mirror of life and ask a fateful question: What am I to become?

For some, there is no answer. For others there may be uncertainty. But for young Roger D. Lehman there is a definite answer. "I am going to be a farmer."

Roger is typical of many young boys who have lived on a farm all their lives and choose to live there in the future. "I guess I've always wanted to be a farmer," said the Pequea Valley senior who will graduate in a few days. "My grandfather moved onto this farm when he was 13 years old, my father was born and raised here and I want to live here too." The answers to the questions were slow in coming but definite in tone. "I've never really thought about doing anything else. I love the outdoors and working with animals. Where else can you get this wrapped up in one job?"

Roger lives with his parents, Mr. and Mrs. Charles H. Lehman, on a 90 acre farm at Ronks RD1. Approximately 60 to 65 acres are planted in corn although there is some rye. There are around 500 chickens on the farm and some steers. The Lehman's also raise pigs.

"My earliest recollection of farm life is gathering eggs, recalled the tall, blonde-haired future farmer. "I've always had my chores to do and rather enjoyed them. I never looked on them as work—you know, the kind of work you hated to do. I never minded them."

In his freshman year at Pequea Valley Roger joined the FFA. He also enrolled in the schools vo-ag course. "I've learned a lot about farming at PV. I've had four good teachers who have helped me to come to the realization that I do want to stay on the farm and earn my living there," noted Roger.

Still, in this fast moving world we live in many young people who have lived on farms all their lives are learning for other vocations Why stay?

"It's hard to put into words," commented Roger "For many years now we have been taking in tourists here at the farm. I've met a number of fellows from New York and other cities There's something different about them I can't quite put it into words but there is something different I guess, through them, I've come to appreciate what kind of life I have here."

Roger Lehman looks out over the scenic 95 acre farm which has been in the family for three generations.

Pigs play a big role in the future of Roger Lehman "We have about 35 sows and 2 boars. About 90 per cent of the pigs were raised right here We sell around 50 to 60 a month and my dad and I hope to double our potential in the next few years We hope to build a sow house in a few months and a farrowing house in a few years We do hope to grow "

The Lehmans have doubled their hog production over the past three years and if hopes are a stepping stone to the future will do so over the next few years as well

"Prices on the hog market have looked real good lately," said Roger "Last month we got 28 cents a pound on the hogs we sold We raise almost all our own replacements and watch our costs so that a reasonable profit can be made I don't believe that too many young farmers are going into raising hogs in a big way I know of another fellow who has a rather large operation who will graduate this year Other than him I don't know of too many young farmers who concentrate on raising hogs Maybe I can corner the market," he laughed

Roger was president of the FFA Chapter, vice-president of

(Continued On Page 19)

Hogs will play a large part in the future farming efforts of Roger Lehman. The Lehmans hope to double their hog production over the next few years.

Local Grain

Thursday, May 18

These prices are made up of the average prices quoted by six participating local feed and grain concerns. It should be noted, however, that not every dealer handles each commodity. All prices are per bushel, except for ear corn which is per ton.

The average local grain prices quoted Thursday, May 18, 1972 are as follows:

	Bid+	Offered+
Ear Corn	39.00	45.33
Shelled Corn	1.39	1.56
Oats (local)	.75	.93
Oats (western)	.98	1.07
Barley	1.05	1.29
Wheat	1.41	1.61

+Bid is the price the dealer will buy from the farmer delivered to the mill. Offered is the price the dealer will sell for at his mill.

New York Dressed Meats

Thursday, May 18

Compared with Wednesday, prices steady for beef and lamb. Calf and veal $1.00 higher, listed hams and spareribs $1.00 higher; picnics 50c higher, other cuts steady.

Demand only fair for railstocks. Pork trade active. Volume of calf and veal moderate, other fresh meats near normal.

Steer Beef

BOILERS
Wednesday, May 17

Ready-to-cook movement continues good with unfilled orders reported from several quarters. Slaughter schedules remain heavy though labor shortages continue to limit output at some plants. Advance interest fairly good with asking prices generally 1 cent higher than this week's levels; however undertone firm. Negotiations too limited to report prices. Less than trucklot prices ½ cent higher on both Plant and U.S. Grade A. Live supplies continue fully adequate to ample for full needs with weights occasionally heavier than desired. Pool trucklot prices for Thursday arrival in the New York area: U S. Grade A 28½-32, M 28½-29½; Plant Grade 27½-30, M 27½-28½.

Eastern Pa. and N.J.

HENS
Wednesday, May 17

Prices unchanged to ¼ cent higher on light type hens. Demand good for limited offerings as processors generally only working part time. Demand fair for barely adequate offerings of heavy type hens. Prices paid at farm · Light type 5-7 mostly 6¾-7 in Pa mostly 5½-6 in N.J.

Auction Report
Tuesday, May 9

(Prices paid dock weights, cents per pound, except where noted).

Hens, heavy type 7-18, mostly 10-14; Pullets 15-31, mostly 25-27; Roasters 12-27, mostly 24-27; Capons 23½-25; Drakes 13-26; Rabbits 47½-70, mostly 62-68; Guineas 53-65, mostly 55-63; Pigeons (per pr.) 90-5.10.

Total coops sold 374.

Auction every Tuesday. Poultry received Monday 7 P.M. to 10:30 P.M., Tuesday 7 A.M. to 12 Noon. Sale at 11:30 A.M.

New York Eggs

Thursday, May 18

Prices unchanged on large whites, lower on mediums and smalls with values of large browns trending lower. Supplies and offerings of large ample and slow to clear. Floor stocks of mediums fully adequate for light demand. Country point offerings of large and mediums increasing with surplus loads scattered. Receipts restricted to regular shippers and arrivals are light. Smalls irregular with local movement unaggressive. Less than fancy quality large offered at 26-28c for limited buying interest. Jumbo clearing with most street sales at 37c. Carton movement into retail outlets is just fair.

Omaha Cattle

Thursday, May 18

Compared with last weeks close, closing prices slaughter steers and heifers 50-75c higher. Cows 25-50c higher. Bulls firm. Feeder cattle strong to 50c higher, instances 1.00 higher on yearling steers and heifers.

Slaughter steers approximately 46 per cent, heifers 37 per cent, fairly liberal per centage Choice and a moderate volume High-Choice and Prime. Cows 9 per cent, feeders 5 per cent. Four day receipts 19,300 as compared 19,000 previous week and 18,900 a year ago. Fed cattle prices advanced sharply with all buying interests aggressive for numbers and quotations early and marketings quite well distributed over trading period. Best steer demand generally centered on 1000-1150 pound withgts moved readily under good demand and a continued broad inquiry for cattle to be slaughtered outside the immediate Omaha area.

Steers: Eight loads High-Choice and Prime 1143-1208 pounds 3-4 36.60-36.85, numerous loads same grade 1023-1273 36.25-36.50 during week. Choice 975-1275 2-4 35.25-36.25, two loads High-Choice 1357 pounds 35.50. Mixed Good grade 2-3 32.00-32.25. Standard and Low-Good 31.00-32.00.

Average cost slaughter steers first three days 35.44 average weight 1133 pounds as compared 34.83 and 1143 pounds previous week and 32.25 and 1131 pounds a year ago.

Heifers: Seven loads High-Choice and Prime 1000-1014 pounds 3-4 36.35-36.40, moderate volume same grade 915-1087 3-4 36.00-36.25.Choice 825-1050 3-4 35.00-36.00.Mixed Good and Choice 750-1000 34.50-35.25. Good 31.00-34.50. Standard and Low-Good 28.50-31.00.

Cows: Utility and Commercial 24.50-26.00, a few Utility Dairybreds 26.25-26.50. Canner and Cutter 22.00-24.50, Mixed Cutter and Utility 24.75-25.00. Shelly Canner 20.00-22.00.

Bulls: Utility, Commercial and Good 27.50-31.00, Commercial grade 1-2 31.50-33.00. Cutter and Low-Utility 24.00-27.50.

Feeders: Two loads Choice 583-651 pounds 42.00-42.35, two loads Choice 735-773 36.50-37.00. Few loads Choice 975-1055 35.50-35.75,High-Good 950-1050 34.25-35.25.

Load Choice 515 pound heifers 39.00.

By far, the lowest cost feeder-bunk combination you can buy. This rugged all-in-one Van Dale shaker feeder costs as little as $23 a foot plus installation. Expert engineering allows silage to be delivered up to 102 feet with only a 3 H.P. motor. You save added dollars through lower maintenance because its unique design virtually eliminates moving parts (no auger, feeder chain or belt).

Your rations travel along a (12" X 33½") self-polishing, stainless steel trough by shaking action. The variable speed heavy-duty drive is safely shielded under the feeder. There's no feeder like it for handling such a total variety of feeds . . . *including* baled hay. Build any length feeder with 10' sections and using a drive unit every 102 feet. Van Dale's low-cost quality will make your non-stop feeding a stainless steal.

Chicken Feed isn't "CHICKEN FEED"

The days of tossing the chickens some corn are long gone. Today, when you're feeding 10,000 layers over a ton of feed every day, the "pennies" really begin to add up.

And in today's economy, any money spent unnecessarily isn't "chicken feed."

Check with Pennfield and find out how a tailor-made Pennfield Poultry Program can give your profits a boost. A big boost . . . not just chicken feed.

Bankers Host Youth Groups

The Lancaster County Bankers Association hosted members of 4-H, FHA and FFA recently at the Host Towne, Lancaster, in recognition of existing relations between the organizations.

Miss Gloria Walls, assistant manager of the Park City Office, Farmers National Bank, presented a talk "The Banker and his Political Environment." Miss Walls previously used this speech in the AIB district speech contest and in District I competition. This win entitles her to travel to San Francisco on May 28 to compete on a National level.

Members of 4-H, FHA and FFA demonstrated various skills to the many County Bankers present.

FHA girls from the Penn Manor Chapter and Garden Spot Chapter explained with the use of visual aids, the meaning of the FHA emblem. Those included in the presentation were: Carolyn Miller, Debbie Gerz, Chris Stehman, Elaine Weaver and Glenda Nauman, from the Penn Manor Chapter; and Donna Lichty and Marlene Wible, Garden Spot Chapter. Miss Kay Maynard, Penn Manor FHA advisor, attended with the girls.

Jay W. Irwin, associate Lancaster County ag agent, reviewed the 4-H program in Lancaster County. He emphasized that 4-H reaches much more than farmers. Lancaster County 4-H Clubs have 2,502 members. Of this number, 636 members are from farms. He stated that 4-H membership is open to all youth.

Roxanne Stein, Mountville, past president of the Silver Spurs 4-H Club, and Gary Dean, Strasburg RD1, president of Red Rose Baby Beef and Lamb Club gave a presentation on what 4-H has meant to them, and how 4-H has developed their leadership qualities. Both are members of County Council.

Other 4-H members attending were: Linda Stoltzfus, Mount Joy RD1; Debbie Gregory, Lititz RD1; Barbara Meyer, Elizabethtown RD3; Suzanne Irwin, Lancaster; David Bitler, Peach Bottom RD2; Steve Ney, Marietta RD1; Gary Dean, Strasburg RD1; Mike Grube Elm, and Kirk Bussell, Manheim RD1.

FFA members chose for their presentation the Regional prize-winning speeches by two Lancaster County FFA members. Mike Martin, Grassland Chapter, presented his speech "The Polluting Man", which won him second place in the Regional Conservation Contest. Adolph Bensinger, Solanco Chapter, spoke on "Leadership", the speech with which he placed third in the Regional public speaking contest recently.

Other FFA members attending were: Carl Musser, Cloister Chapter; Gary Shelley, Mount Joy Vo-Tech Chapter; Greg Landis, Penn-Manor Chapter; Richard Kauffman, Manheim Chapter; and Jerry Diller, Lampeter-Strasburg Chapter. They were accompanied by Jess Erway, president of the Lancaster County Vocational Agricultures Association, representing the FFA.

The dinner was chaired by Stanley Musselman, who is retiring after 13 years of service as the youth representative of the Lancaster County Bankers Association.

Rat Control Grants

Four counties and 16 minicipalities will share the $500,000 allocated by the state for community rat control program grants this year, according to William B. Middendorf, director of the Bureau of Community Environmental control.

Included in the municipalities awarded state rat control grants are: Chester, $44,000; Lancaster, $25,000, and York, $20,000.

Warning Issued for Rocky Mountain Spotted Fever

Pennsylvanians are urged to exercise the caution necessary to protect themselves against Rocky Mountain Spotted Fever during the coming warm weather months.

In 1971 there was a 63 per cent increase over 1970 in the number of cases of the disease reported in Pennsylvania. Of the 18 reported cases, 11 occurred in children under 10 years of age. Children are especially vulnerable to the disease because they are often exposed during outdoor play to the bite of the common dog tick, the usual vector of the disease.

If untreated, Rocky Mountain Spotted Fever can kill one person out of every five who contact it. The illness may begin three to 10 days after the tick bite and is characterized by sudden onset with fever, headache, chills and conjunctivitis. A rash, which begins on the palms of the hands and the soles of the feet, may appear on the third day.

Vaccine for Rocky Mountain Spotted Fever is available and is recommended for those persons at high risk to tick bites and for laboratory workers.

"Unfinished Symphony"

Schubert's "Symphony No 8 in B Minor" is called the "Unfinished Symphony" because it has just two movements, instead of the usual three or four movements of the classical symphony.

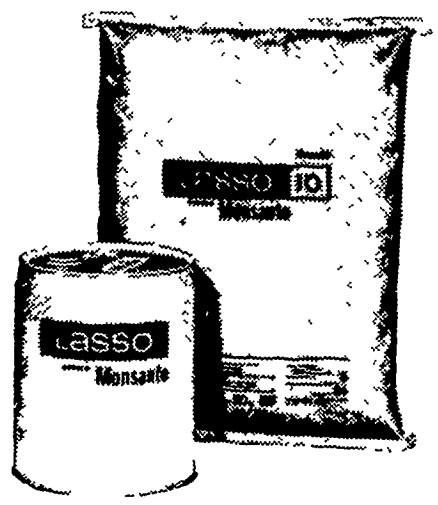
Certainly Lasso® gets all kinds of foxtail:

Yellow. Green. Giant.

Control three foxtails for the price of one. Apply Lasso in corn or soybeans and get 'em all. Plus lots of other grasses like crabgrass and fall panicum. And broadleafs like pigweed, too.

In short, no matter which foxtails have been your problem weeds, get rid of them (and a lot more) with Lasso.



That's what you expect from your herbicide.

Miss McCartney, IFYE Delegate, Returns Home from Brazil

Editor's Note: Miss Davida McCartney, Chester Springs, Chester County, recently returned from her assignment in Sao Paulo, Brazil. She had to return early due to difficulty in getting her visa renewed. Miss McCartney reveals she is available to speak to your groups. To make arrangements, contact her at 215-458-8446.

Greetings from Chester County, Pennsylvania. Yes, I'm back from Brazil. My stay was cut short just when I was getting really involved with the youth programs. I was indeed sad to leave my wonderful Japanese-Brazilian family and all my new South-American friends, but now that I am home, I am happy to be here.

There was just time for two weeks of touring other regions on my way out of Brazil. I had been acquainted with only the Southeast region, including the State of Sao Paulo which was my home. So I first travelled South of the Paraguayan border to see the fantastic Iguazu Falls, greater in height and width and expanse than Niagara, and with a greater volume of water in the rainy season. About six hours away I visited Vila Velha, another natural wonder, an interesting group of winderoded rocks.

Then, heading northward, I stopped in the 11-year-old ultra-modern capital Brasilia, situated on a high central plateau, far from the other main cities of the land. The new architecture is striking, and the solution to the housing problem unique. The "super blocks" are big dormitory-like buildings with shopping and educational areas nearby.

Miss Davida McCartney
Chester County IFYE

Leaving this newness, I flew to old Salvador in the NE region. This is a city with a church or chapel for every day of the year. I had time to visit only a few of the many beautiful old Catholic churches dating from the 1600's. I also met and stayed with the wonderful family of Marcello Mariano da Silva who had spent six months of last year in Chester County with the Robert Brigham family on the Youth for Understanding Program.

In Pernambuco I was able to visit friends and former Lancaster County 4-H'ers Don and Ginny Wivell Ranck who were doing social work with the Mennonite Central Committee. There I enjoyed meeting many of the local Brazilians and seeing the good work Don and Ginny were doing. The hilly countryside gives the appearance of a mammoth sugar cane field. I saw cowboys practicing for the rodeos, and joined in a traditional fisherman's dance on the beach in Recife.

The last stop in my Brazilian tour was in the port of Belem in the northern region. Daily there is a large open-air market by the shore where you can buy almost anything. My schedule didn't permit me to hop a boat up the river, and since both my arrival and departure flights in Belem were in the middle of the night, I did not see the mighty Amazon. Though this was a disappointment, I am thankful to have managed to cram a lot of sightseeing into my limited travel time.

Now that I'm back with both feet on Pennsylvania ground, I'm readjusting to life American style, where cans and can openers, plastic bags, and electricity aren't luxuries. Equipped now with a second-hand set of wheels and a new slide projector, I'm just about ready to set out again, this time to tell my impressions of Brzail, with the help of the pictures I took that escaped being lost in the mails between here and there.

A special big thank you to all who helped underwrite this unforgettable experience with your contributions and letters and good wishes. If you'd like me to give an illustrated talk to your group on YDP work in Brazil, please get in touch.

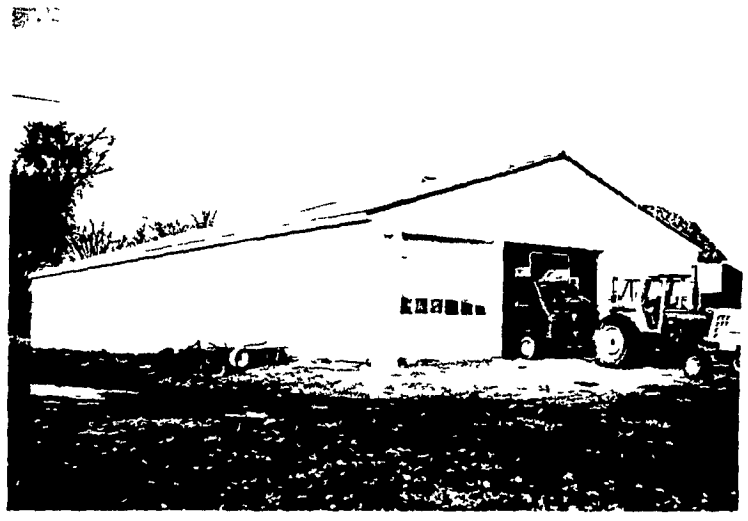
AGWAY PRE-ENGINEERED BUILDINGS

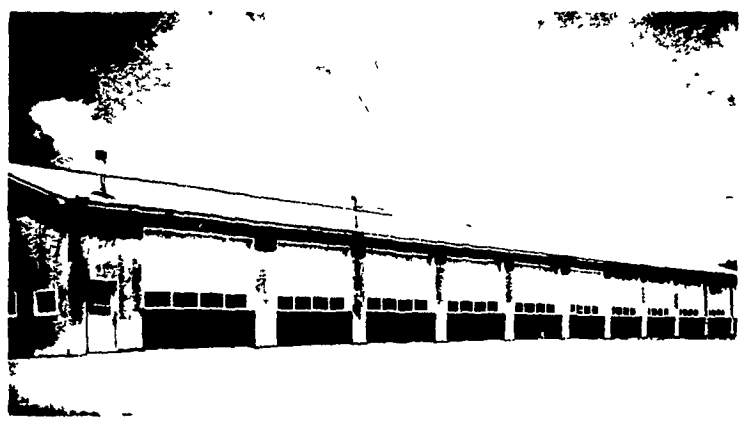
FOR AGRI-BUSINESS AND COMMERCIAL USES

AN AGWAY BUILDING TO MATCH YOUR INDIVIDUAL REQUIREMENTS

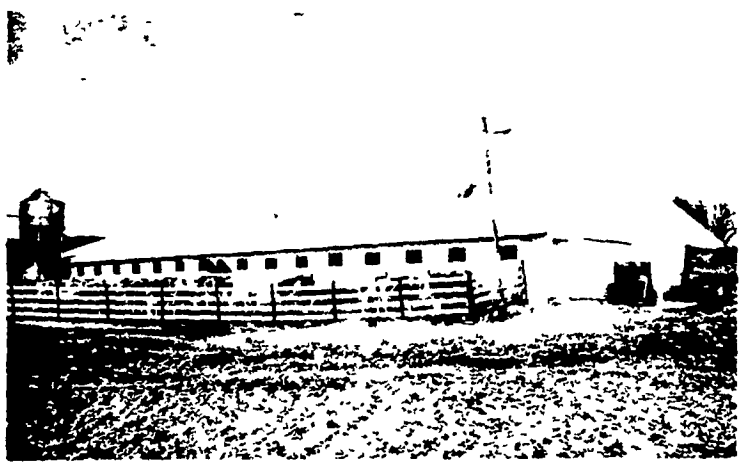


Farm equipment represents a growing investment. Keeping it in "ready-to-go" condition calls for the proper shelter to aid your maintenance program. Agway has the layout and size to match your equipment storage requirement . . . and the door design to give you the accessibility you want.

Agway functions as the general contractor, taking the entire burden off your shoulders and allowing you to concentrate on what you know best — your own business. Under this system, you have only one person to deal with: Agway. Shown above is a construction supervisor, who makes sure your building is erected according to plans.



The tested construction techniques Agway has perfected for farm buildings are also an economical way to provide space for many commercial operations, such as garages, repair shops, warehouses, freight sheds.



The first criteria of the Agway building is meeting your operational objectives, whether it is a livestock shelter or a utility building. The second benefit assured by Agway building service is the combination of quality materials and tested construction technique that will assure a trouble-free building for generations.

Cold Weather Hits Peach Trees

The early growing season in Pennsylvania suffered a setback last week as the average weekly temperature at all but one of the 19 reporting stations dipped below normal The lone exception was Altoona

What this will mean at harvest time is still unknown The Pennsylvania Crop Reporting Service said the crop hardest hit was the fruit belt in the Southcentral area of the state where about one-third of the peach trees were in full bloom as temperatures dropped below freezing

After just one month of comparative figures five areas are already showing a deficiency in rainfall This drying out did permit farmers to get back in the fields.

The cook weather has slowed the growth of winter gr ,ins, hay and pasture and fruit development in the central and northern counties

Papal Residence

The Vatican Palace was begun in the 800s and many Popes added to it later, but it became their official residence only after they returned from Avignon, France, in the 1300s

Certainly Lasso® controls the weeds in most any soil:

Silty. Sandy. Clay. Or loam.

Use Lasso liquid or granules to get the grasses. Most weeds, too. Anywhere you plant corn or soybeans in Southeast Pennsylvania, New Jersey, Delaware, Maryland, or Virginia. That's a big area. With a lot of soil types. And a lot of different organic matter levels.

But no matter how your soil type and organic matter changes, your herbicide won't have to. Not with Lasso. To get the grasses. Many broadleafs, too. In corn or beans.

That's what you expect from your herbicide.

The Pequea Valley FFA Chapter's new officers assumed their duties at a meeting at Pequea Valley last week. Officers are: front row, left to right, Don Miller, president; Charles Neff, vice-president; John Beyer, treasurer. Back row, Harry McConville, reporter; Tom Denlinger, secretary; Carl Caskey, chaplain, and Gordon Hoover, sentinel.

Fulton Grangers Hear Patriotic Program

The American Junior Citizens Club of Quarryville presented a patriotic program with the theme "Ameirca Is We The People" last week at the regular meeting of Fulton Grange 66 held at Oakryn. Mrs. Martin S. Stoner, Quarryville, directed the presentation and Mrs. Richard Spence, Quarryville, was pianist.

The group sang "Hail The Home Of Freedom" and "My Own America."

Winning essays on the theme "American Is We The People" were given by John Abel and Debbie Krantz. Miss Kranta won the D.A.R. Thatcher award this year. A trumpet solo "At The Fair" was rendered by Debbie Krantz.

Recitations, "It's Fine Today" by Lisa Thompson, and "How To Be Happy" by Carol Howard were given. A playlet "Bringing Up Father" was given by John Abel, Vicki Myer, Sandy Moore, Keith Singles, Joan Cunningham and Tom Kachel. Violin duets "Graduation March" and "American The Beautiful" were presented by Lisa Thompson and Ann Sweigart. A clarinet trio was given by Diane Rineer, Vanessa Bledsoe and John Abel. Group singing "May The Good Lord Bless and Keep Thee" featured the girls octette and the closing song of the school Alma Mater.

Richard Holloway, master of the Grange, presdied at the business sssion.

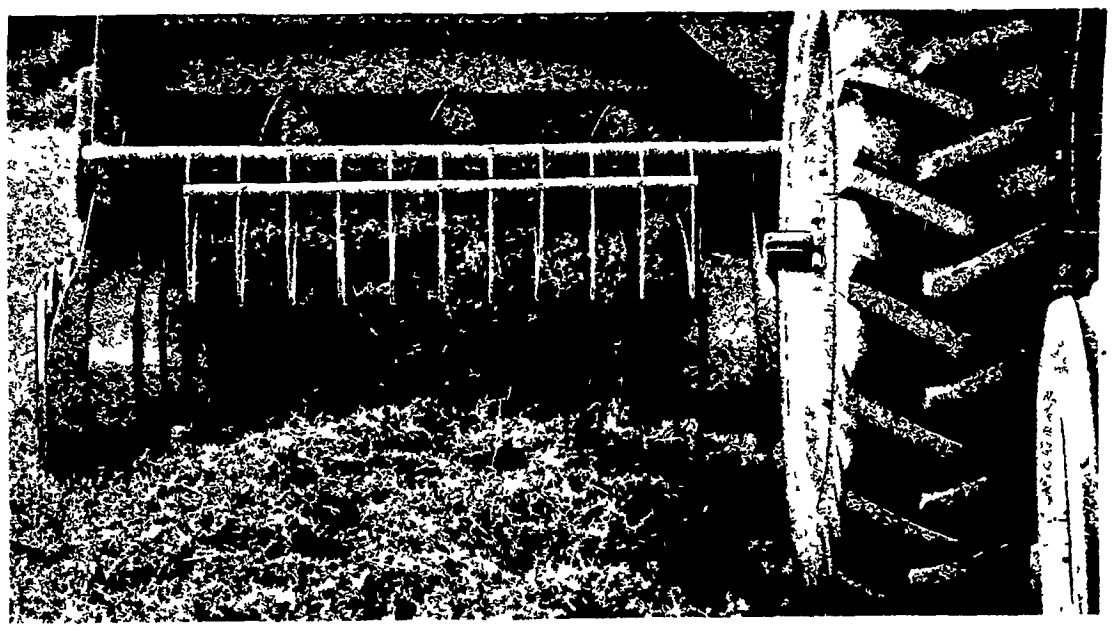
Plans were made to hold the annual Go-to-Church Night May 28, 8 p.m. at the Grange Hall. It will be in charge of the chaplain, Gyles Brown. It will be preceded at 7 p.m. by a covered dish supper in charge of the Womens Activities committee.

Fulton Grange presented an ecology program Tuesday night at the meeting of Colerain Grange at the Quarryville Fire Hall. Howard W. Chapman, assistant deputy of Air, Water and Community Protection in the State Department of Environmental Resources will be the speaker. There was special music and other features on the program. Salisbury Grange officers opened and closed the meeting.

Four members will attend the Pennsylvania State Grange Leadership School at Gettysburg College June 27-29.

Robert Welch, Pennsylvania Health Care Committee, will speak on the Burleson McIntyre proposal at the next meeting, May 22 and Gyles Brown will be in charge of the annual memorial service.

June Dairy Month will be observed June 12 with the annual homemade ice cream party and the agriculture committee will be in charge of the program.



New John Deere
Balers have
more teeth outside
the tractor tires

Heavier hay and bigger cuts mean wider windrows—so our quiet new Balers have extra-wide pickups. Pickup on the heavy-duty 346 is 71 inches across (including side flares) with 144 teeth; 61 inches and 80 teeth on the 336.

But that's only half the story. Usable pickup width—the area that can be used without driving tractor tires over the windrow—is the other half.

Pickups on the new John Deere Balers are offset 10 inches from the bale case. This puts the pickup out where it's usable—not behind the tractor tires.

Stop in and see for yourself.

The Truth About Meat Prices

Never has there been a clearer illustration than the present situation in the meat industry of how inflation destroys logical reasoning and sets group against group. With perfectly straight faces, so-called experts have charged that meat prices are too high—that consumers should even stop buying meat. As a spokesman for the meat industry put it in answering a columnist who made much of the fact that live market cattle have hit the highest point since the Korean War: "Why in blazes must that be reported as dire news? The real news is that cattlemen finally are back to where they were 20 years ago! How many other businesses and industries are selling products and services at 1952 prices?"

As far as the retail price of meat to the consumer is concerned, prices in the last 20 years have gone up less than 40 per cent while disposable income has increased more than 100 per cent. Seldom do stories about the price rise take into account the increased cost of labor, sanitation, grading, pollution controls, transportation, refrigerator and so forth. In spite of these rising costs, consumers currently spend, on the average, five per cent of their income for meat. Twenty-five years ago, as a percentage of take-home pay, meat took six per cent of consumer income.

The story of meat prices is, if the truth can be recognized, a classic story of the efficiency of the free market. Facts show that over the years, U.S. consumers have had an abundant supply of meat at fair and reasonable prices—prices set by supply and demand in the marketplace. Making the meat industry an inflationary scapegoat will neither curb infaltion nor help consumers. It will threaten the country with a meat shortage.

A Product of Freedom

Underlying the productiveness of American agriculture is the dedication of farmers to the principles of private ownership of land, private initiative, the right to a fair profit and the right of individual opportunity The nation's largest farm organization, the American Farm Bureau Federation, representing more than two million farm families, is an articulate spokesman and indefatigable defender of these principles

The Farm Bureau's interests are wide-ranging They include advocacy of a reasoned approach to the use of agricultural chemicals and endeavors directed toward improving the marketing and bargaining position of farmers It urges enactment, for example, of the National Agriculture Marketing and Bargaining Act of 1971 Its reason for supporting that Act is that, "A growing volume of farm production is now produced and marketed under advance contracts between farmers and handlers This has led to a need for legislation to require handlers of agricultural products to bargain in good faith with qualified agricultural associations. . . " In advocating what it believes to be an improved marketing mechanism, the Farm Bureau's policies merely reflect a desire to strengthen a competitive free market in agriculture, a desire for " . . equity in bargaining—not politically imposed compulsion."

There could be no American Farm Bureau Federation in the USSR or any other socialist or communist nation. It is a product of a system that sets the individual above the state. The backbone of this system is the private ownership of land as typified by the enterprises of millions of American farm families. The policies and measures advocated by the Farm Bureau have but one purpose, to help preserve the freedom, the responsibilities and the rights that are the heritage of every citizen and are instrumental in maintaining U.S. agricultural abundance.

School Year Ends

Very shortly, American life will undergo a characteristic seasonal alteration The closing of school will mark its equinox just as surely as the passing of the sun scross a fixed line separates Winter from Spring With the closing of school, the trek of summer tourism will get underway—another awesome demonstration of U S mobility The responsiblity of summer jobs for students will do little to lessen the rush to enjoy the freedom of what remains of the wide open spaces Incalculable numbers of boats, campers, autos and every conceivalble type of motorized vehicle will be on the move Perhaps a sign of the times will be the increasing flood of bicycle excursionists

As school vacation time approaches, so also will a test of how genuine is public conern for the environment Now is the time to resolve to avoid littering—to respect the land and its wildlife. If each individual would carry this resolve with him through the summer, a giant step would have been taken toward preserving our planet as a fit place to live.

Needed—Old-Fashioned Initiative

America's energy resources, such as petroleum, are far from exhausted But it is going to take a large dose of old-fashioned initiative and astronomical capital investment to make them available for man's use—and there is no dodging the fact that the energy-consuming public will be called upon to pay more for its gas, oil and electric energy

A late report presented at a meeting of the American Petroleum Institute illustrates what it takes to meet today's energy needs so far as the petroleum and gas industry is concenred The report dealt with the costs of drilling oil wells in the Rocky Mountain region and with a new technology of recovering increased production of oil from existing fields The cost of drilling an oil well in the Uinta Basin of Utah ranges from $400,000 to $2 million The report noted that although drilling in this area is expensive, it is still economically feasible "by using good drilling practices, proper equipment, well-trained people and quality materials . " On recovering oil from older fields, the report describes a new method of injecting carbon dioxide to force more oil out of the ground This technique will step up production in a Texas oil field by some 230 million barrels—at a cost estimated to be more than $175 million.

What the public must understand is that not only would an energy shortage affect their daily lives, but to avoid it is going to cost money.

NOW IS THE TIME . .

Lancaster County Agent

To Be Careful With Weed Spray Containers

The problem of weed control faces most gardeners and farmers. In many cases a herbicide can be used to kill the weeds; however this is a practice needing very careful attention and the close following of the regulations. Sprayers or containers in which any of the 2, 4-D weed killers were used last season may still contain enough of the herbicide to injure suceptible plants this season. It is suggested that equipment used for weed killing be marked so others will not use this equipment to spray normal flowers and vegetables. It is very difficult to get the 2, 4-D materials out of equipment (household ammonia and hot water can be used) and in many cases the next crop is injured. We have been consulted in cases where the equipment was used last fall to spray weeds and now used to spray vegetables, flowers, or tobacco beds with serious results. Be careful with weed killer equipment at all times.

To Provide Salt and Minerals

All livestock should have free access to salt and minerals at all times; the amounts needed will vary between different animals and this is the reason that free choice should be provided in addition to mxing into the grain ration. Some recent research with dairy cattle reveals that some animals will not consume enough for their own good on a free choice basis; therefore it is suggested that the major minerals such as calcium and phosphorus be mixed into the ration of dairy cattle based upon a forage test of the roughages. Liberal salt consumption will aid in the secretion of digestive juice and increase water consumption.

To Keep Shields and Guards in Place

During the rush of the planting and harvest season some farmers may forget abut the importance of keeping protective guards and shields in place. In most cases the manufacturer has constructed the shields to keep the operator out of dangerous places. When these shields are removed then any human is exposed to this added danger. All farmers are urged to stress the importance of machinery safety to their family and their hired help. Too much speed with the machinery and too much rush on the part of the operator are other causes of serious accidents. We urge all farm equipment operators to take time to be safe and keep protective shields in their places.

To Provide Ample Ventilation

Extremely hot weather may arrive at any time and all livestock producers are urged to try and keep their animals as comfortable as possible. Livestock suffer from hot weather and high humidity the same as human beings. Shade is very important to protect animals from the hot sun; if they are confined in a guilding, then cross ventilation or electric fans to keep air moving is important.

THE BIBLE SPEAKS

Internat onal Un form Sunday School Lessons

BY LAWRENCE W. ALTHOUSE

TEACH NOW, REAP LATER

Lesson for May 21, 1972

Background Scripture Matthew 28 9, 20, 1 Timothy 4 6 16, 2 Timothy 2 1, 2
Devotional Reading 2 Timothy 3 14 through 4 2

A man condemned to die in the electric chair approached his last minutes on earth with a crowd of newspaper reporters, photographers, and officials Did he have any final statement to make? Looking at the throng surrounding him, he said "If I had been shown so much attention when I was a boy, I would not be here today!"

Rev. Althouse

One cannot help wondering how many men and women like him might have had a different life had they encountered more attention and concern at an earlier stage of life The churches have a great commission to "teach" all men everywhere, but to many congregations respond to that command only when people seek out the church and even then they may fail to do so

"Teach these things . . ."

Whenever we perform a baptism in our church, the congregation is asked to promise to "accept the responsibility of assisting these parents in fulfillment of the baptismal vows, and undertake to provide facilities and opportunities for Christian nurture and fellowship . . ." Something of this sort is probably asked for in most rituals of baptism Yet, how seriously do we take that charge?

After a hard day's work, a mechanic was observed playing baseball with his son. "Bill, aren't you tired?" asked his friend. "Sure, I'm tired," the mechanic answered "Well, what are you doing that for?" his friend asked "Oh," sighed the mechanic, "I'd rather have a backache now than a heartache later on"

Perhaps too many of us settle for the "heartache later on" Teaching the Christian faith often seems "too much trouble" to many of us If our church has a church school program it may only be because a few dedicated people are willing to carry on week after week a thankless task Choirs are feted at banquets, trustees and deacons are honored, and finance committee members wield great power, but church school teachers are almost anonymous in many churches

Entrust to faithful men

The writer of 2 Timothy stressed the importance of the teaching ministry " what you have heard from me before many witnesses entrust to faithful men who will be able to teach others also" (2 2) Today, it would seem appropriate to change "faithful men" to "faithful women," for in many churches, teaching is regarded as a woman's job No wonder our youth get such a strange idea about the importance and relevance of their church school experience

Many of us would do well to reconsider the imperative to "teach these things" for, difficult as this task may be, the fruits we will reap later for Christ and the Church are innumerable

(Based on outlines copyrighted by the Division of Christian Education, National Council of the Churches of Christ in the U S A Released by Community Press Service)

FFA Alumni Hold National Meeting

ALEXANDRIA, VA. — More than 200 farmers, agribusiness leaders, and government officials, all former members of the Future Farmers of America (FFA), were in Chicago Friday, May 12, for the organizational meeting of the National FFA Alumni Association.

Purpose of the meeting was to elect a national slate of officers and to decide on state, local and national activities in which members can participate. This was the first national meeting of the FFA Alumni Association, which was formed two years ago at the National FFA Convention when state delegates of the national youth organization voted to create an alumni membership status.

According to Gus Douglas, National FFA Alumni Council Chairman and Commissioner of Agriculture in West Virginia, "The FFA Alumni Association is striving to develop activities that will complement the activities of local vocational agriculture departments and FFA chapters."

Although the National Alumni Association has been formally organized for only slightly more than a year, 15 states have already chartered State FFA Alumni Associations. Total membership in the National Association now stands at over 3,000 members and according to Alumni Association administrative secretary, Jay Benham, the membership is growing rapidly. "We estimate that over three million students of vocational agriculture have been FFA members over the 44 year history of the organization," sys Benham. "We realize that the present membership is only a small beginning, but response to date makes us optimistic that the Association will grow to a sizeable organization. Our biggest challenge so far has been to locate former members and to inform then of our organization's existence and purposes."

According to Benham all former FFA members, honorary members and teachers of vocational agriculture are eligible for membership in the FFA Alumni Association. All who joined prior to May 12 will be considered "Charter Members" and received a special charter membership card. National dues for the organization are $4 per year or $100 for life membership.

The purpose of the FFA Alumni Association are:

To support and promote the FFA organization, FFA activites, and vocational agriculture on the local, state, and national levels;

To provide a tie to the FFA and to assist FFA and agricultural educational personnel to involve former members in worthy activities;

To promote a greater knowledge of the agricultural industry and support education in agriculture, and

To cooperate with the National FFA Board of Directors, National FFA Foundation Board of Trustees, and the National FFA Foundation Sponsoring Committee.

DairyExpo Winners

The following local youth were included among winners at the 47th Annual Dairy Exposition held last Saturday at Pennsylvania State University:

Individual breed winner for showing—Harold Moyer, Lebanon, reserve champion.

Individual breed winner for showing Jerseys—Matthew Young, Peach Bottom, champion.

Fitting contest individual winner in Jerseys—Matthew Young, Peach Bottom, reserve champion.

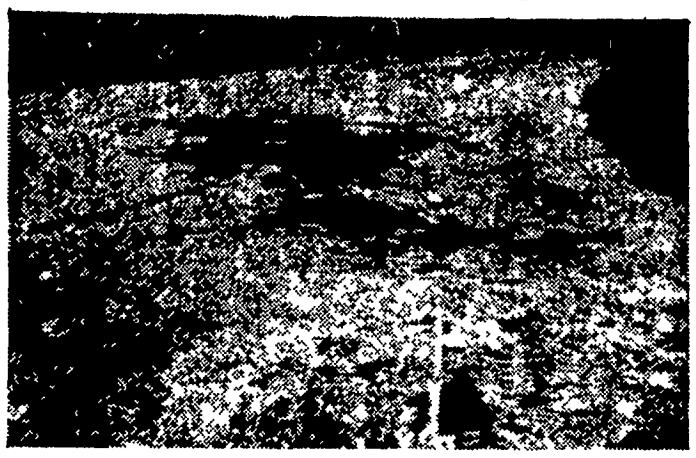
Amateur dairy cattle judging contest, Holstein class—Sally Wiggin, Dallas.

Weather Causes Farmers to be Behind Schedule

The first two weeks of May were plenty cool and wet.

Hay is just beginning to make rapid growth in our area because cool temperatures had held back initial spring growth.

Wet weather also held back spring field work with most growers one to two weeks behind schedule. Topsoil moisture supplies were reported surplus for the second straight week.



ALGAE: The Spoiler

Your lake, pond or stream no longer must bear the odor and scummy plague of algae — or the harmful, even lethal, effect it can have on fish, wildlife, animals and humans.

CUTRINE, when used as directed, eliminates ALL forms of algae at SAFE limits to other living things.

No other algaecide can make that claim. **CUTRINE** has been thoroughly tested and proven in commercial use. It is registered with the U.S.D.A. (No. 8959-1).

Water treated with **CUTRINE** is safe immediately for swimming, fishing, watering, irrigation

McHale Attacks High Meat Prices

Consumers have been deceived if they think farmers have been the cause of high meat prices, said Pennsylvania Secretary of Agriculture McHale.

"The Price Commission should put the heat on supermarket chains and processors," said McHale, "and not threaten controls on raw agricultural products."

McHale noted Price Commission Chairman C. Jackson Grayson, Jr's statement that more than 1,000 large companies have failed to meet a May 1 deadline for filing quarterly profits reports with the commission.

"I want to see Grayson make good on promises to scrutinize profit margins and markups by food companies," said McHale.

The Secretary said the rise in meat prices earlier this year were completely out of proportion to prices received by the livestock producer.

"In January, the price paid for choice steers was about $2 per hundred pounds over the level of last August," McHale recounted. "This works out to about an additional two cents a pound for the farmer, justifying perhaps about a four cent increase for the retail price of meat.

"Instead prices rose as much as 20 cents a pound, which meant that for every penny the livestock producer received someone else got an extra nickel."

Further, said McHale, "The supposed beef shortage is a sheer myth created to explain higher prices."

He said per capita meat and pork supplies will actually be higher in 1972 than 1971.

McHale said the marketing system since 1949 has increased its per-pound margins on beef from 19 cents to 36.8 cents and on pork from 19 cents to 37.6 cents.

"The marketing system has doubled its margins," said McHale, "while both farmers and consumers are worse off."

Graybill Speaks to Advertising Club

Robert Graybill, president of Pennfield Corporation, addressed the monthly dinner meeting of the Lancaster Advertising Club last week at the Lancaster County Riding and Tennis Club. His subject was Pennfield Corporation, which is only one year old, having been formed with the consolidation of Miller & Bushong and D. E. Horn in March, 1971.

He said, "Our roots are with the farmers, working to supply them with the best feeds at the lowest cost and helping them to increase their production."

Pennfield Corporation is holding on to that tradition, he explained, but is also expanding and broadening the base of operations to create greater markets for the farmers products.

He told the background story of how Pennfield was created from nine diversified companies which made it possible for the new corporation to branch out into the producing and marketing of new consumer food products.

"Shortly you will be seeing new food items in local supermarkets with the Pennfield label; these products will be backed by extensive advertising promotions which are the result of careful research and planning," he said.

He concluded that his company, now counting more than 500 employees in feed, egg, chicken and prepared food divisions, is not standing around complaining and blaming about the negative trends which exist in the food production business today.

"Pennfield Corporation is moving ahead, expanding and increasing its capactiy to help customers in changing times."

This week-old pig's stomach is exactly this size. The little dry feed it takes to fill this tiny "fuel tank" must be LOADED WITH POWER!

Purina Pig Starters

give your pigs EXTRA protection

for about ½¢ per day

It takes mighty little dry feed and sow's milk to fill the tiny "fuel tank" of a baby pig from the time he's a week old until he's three weeks old. An average of about an ounce a day of loaded-with-power Purina Baby Pig Chow or Purina Early Weaning Chow is all it takes to give him extra energy, fast growth and disease protection.

This extra protection during this critical period costs about ½ cent per pig per day! That's low-cost insurance to provide pigs with the "built-in" livability, the grow and go power, offered by Purina starters.

Pigs *love* Purina Baby Pig Chow and Purina Early Weaning Chow, too—and that's important, for it makes no difference how great a pig starter may be, if pigs won't eat it.

Let us help you get your pigs off to a thrifty start with Purina Baby Pig Chow or Purina Early Weaning Chow. Stop in and see us soon.

Pennsylvania Farmers Association — Urge Stronger Milk Marketing Law

Members of the Pennsylvania General Assembly were urged to take a frontal attack on three major issues facing the legislators. The request came in a speech delivered by Eugene Thompson, vice president, Pennsylvania Farmers' Association (PFA), to more than 350 farmers and legislators attending a banquet at the Penn Harris Motor Inn.

PFA is a general farm organization with more than 15,704 members, representing 47 county associations. It is affiliated with the largest general farm organization in the world — The American Farm Bureau Federation.

Thompson, chairman of the group's legislative committee, called for action to strengthen the Milk Marketing Law, restoration of appropriations in the governor's budget for state meat inspection, and final approval of reforms in the area of farmland assessment

"The PFA Dairy Division suggested three changes in the Milk Marketing Law," the Indiana County dairyman stated, "which would result in savings to the consumers and not wreck the total marketing system within the milk industry. Changes in the law might be necessary, but we don't believe it necessary to destroy the milk marketing structure in Pennsylvania just so we can say there has been a change.

"Governor Shapp proposed a new milk marketing program, and certainly there were some items in his proposal that would benefit the overall milk marketing program. It was the decision of the dairy division members . . . to stick with our present system of establishing minimum resale prices for milk.

Our present system has stood the test. We know what it can do from its performance record, and there has not been any evidence produced by anyone showing that today's problems cannot be resolved within the framework of our present milk marketing structure. Instead of finding means by which to destroy the milk marketing law, we should seek ways in which to strengthen it"

Switching to the subject of meat inspection, the farm leader called for "immediate action to save the state meat inspection program" PFA has been one of the chief critics of the way the state meat inspection program is being operated, which was acknowledged by Thompson: "We are not satisfied with the efforts to improve the program to date, but the department is thinking in the right direction. We know the program would go steadily downhill as fas as the small meat establishment is concerned if the federal government takes over."

In the five states where the federal government has taken over "the program has suffered greatly . . . Nearly 50 percent of the plants, jobs and revenues generated were lost" in the switch from state to federal, according to Thompson. "The federal inspection program is not geared to the small operator. It's geared to the large meat plants."

PFA has been actively supporting reforms in land assessment because it feels agriculture is "paying an unfair" share of the tax load. "The General Assembly approved farmland assessment legislation which was a vital first step twoard changing the constitution of the Commonwealth. This revision would permit land to be taxed on use and not on the wishful thinking of some housing developer.

"The next big step will require approval by the new General Assembly which starts meeting in January," Thompson concluded as he urged legislative support for the proposed legislation.

A 10-member delegation represented the Lancaster County Farmers Association at the annual Pennsylvania Farmers Association State legislative dinner and briefings in Harrisburg recently. Members of the local delegation and State Legislators included: front row, left to right, Representative Sherman Hill; Mrs. Ivan Yost; Mrs. Helen Wivell; Senator Richard Snyder, and Representative Harry Gring. Second row, Roy Greider, Noah Wenger, Harold Rohrer, William Dean and John Henry Brubaker. Back row, Ivan Yost, Richard Hess and James Kreider, president of Lancaster County Farmers Association.

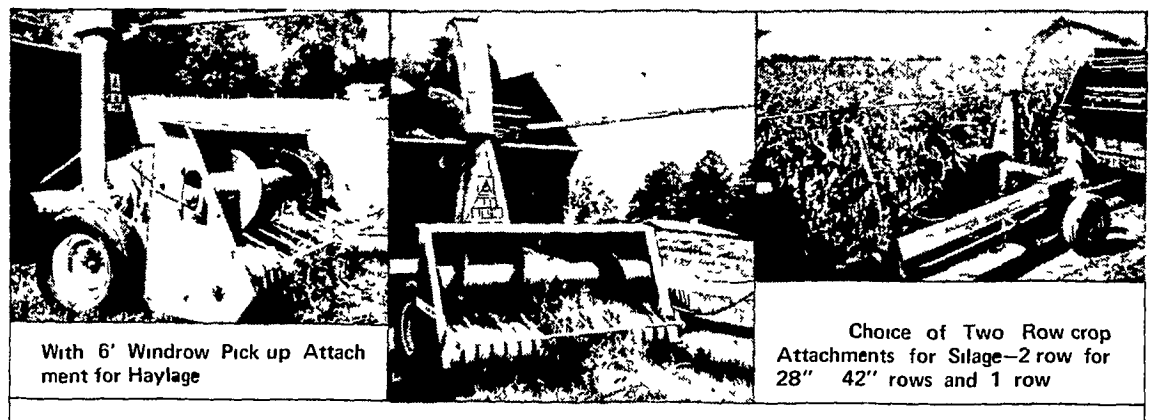
NEW 720 FORAGER FIELD HARVESTER

ALLIS-CHALMERS



With 6' Windrow Pick up Attachment for Haylage

Choice of Two Row crop Attachments for Silage—2 row for 28" 42" rows and 1 row

Chops Fast and Fine—at Low Cost Per Ton

The Model 720 FORAGER makes high quality haylage and silage chopped the way you want at a cost that ll help your profits on your livestock From multiple position hitch to adjustable deflector spout the 720 is designed for efficient economical forage harvesting and fast changes from one crop to another

6 pick up attachment handles heavy windrows with ease does a clean job in picking up green forage wilted hay cured hay or straw Pick up fingers comb the stubble and feed material to the auger in a steady stream save more of the leaves

Row crop attachments match your row width guide stalks into chopper with three gathering chains per row Two row attachment adjusts for row spacings from 28 to 42 one row attachment harvests rows of any width

Cylinder center pivot maintains constant relationship between gathering unit and feed rolls for even feeding

Feed roll springs are adjustable to give you the proper tension for any crop

Reversing mechanism lets you reverse rotation of feed rolls and gathering unit from tractor seat for fast clean out

Eight cupped tungsten carbide knives on cylinder cut *and* throw crop in a single fast smooth operation There s no need for a power consuming blower Scissors action of curved knives against shear bar produces a fine cut

Shear pins protect cylinder drive and drive line for long life

Built in sharpener lets you put fresh keen edge on knives without removing them from the cylinder

Shear bar is reversible and replaceable with hardened edges for clean cutting

Delivery chute rotates for side or rear delivery into truck or wagon can be positioned easily from tractor seat

Deflector spout adjusts from tractor seat for full wagon loading

Multiple position hitch adjusts easily to match tractor drawbar height

Heavy 6 tubular steel frame is built to withstand the jolts and jars of operation over rough fields

Optional axle extensions change harvester tread to match row widths

High flotation tires are available if field conditions require them

Troy Meat Plant Charged In Meat Inspection Program

A crackdown on illegal sales of "downer" beef – meat from cattle brought to plants in a dead, dying, diseased or disabled state -- has been declared by Agriculture Secretary McHale.

"Tainted meat constitutes a dire health hazard to Pennsylvania consumers," said McHale as he disclosed that a meat plant in Troy, Bradford County, was shut down indefinitely for allegedly selling adulterated meat with false inspection labels.

"Issuing a cease and disist order to this plant is in line with the department's responsibility to protect the consumer and administer the federal Wholesome Meat Act of 1968."

In closing the meat plant, compliance officers of the department's Meat Hygiene division filed information with the local magistrate charging violations on 12 counts of the state law.

A month-long investigation of the Troy plant, which received some of its adulterated meat supply from New York State farmers, involved the cooperation of state and federal meat inspectors.

During the investigation, nearly two tons of adulterated and unmarked meat were destroyed. The plant's distribution of meat had extended to the Philadelphia area.

Reports from state compliance officers cited shipments of "downer" cattle to the Troy plant. State and federal law mandates that meat plants accept only healthy cattle for processing and sale to retail outlets.

State inspectors charged that employees of the Troy plant were stripping "Not for Sale" labels from allegedly custom beef (meat slaughtered exclusively for farmers' use) and boxing the meat for commercial sale with state inspection labels attached.

Owners of the plant will be subject to fines of up to $3,600 if a conviction is sustained, said McHale.

The state meat inspection program, charged by law to bring state standards up to the federal level, is financed on a 50-50 basis with federal funds.

Price Index Up from 71

Prices received by Pennsylvania farmers during the month-long period ending April 15, 1972, dropped four points according to surveys by the Pennsylvania Crop Reporting Service.

The index fell from 281 to 277 with the 1910-1914 average of prices received by farmers equal to 100. Despite the drop, the index is still five points higher than a year ago.

Contributing to the slide downward were lower prices for oats, wheat, hogs, eggs and broilers. Other selected commodities bringing in higher prices for the farmers included milk, steers and heifers.

Across the United States the index of prices paid by farmers went up less than a point to 125. This index uses 1967 prices as a base. Similar figures for the Commonwealth were unavailable.

Frank Stoltzfus Winner of Twin Valley DeKalb Award

Frank Stoltzfus, immediate past president of the Twin Valley FFA and the Berks County FFA, has been announced as the winner of the 1971 DeKalb Agricultural Accomplishment Award. The award will be presented to him at the annual Senior Awards Asembly at the Twin Valley High School on May 26 by Francis B. Wood, assistant superintendent of Twin Valley School District.

The DeKalb award is given to outstanding seniors in vocational agriculture departments throughout the nation. Frank has chosen to receive the award on the basis of scholarship, leadership, and his supervised farming program.

Frank is the son of Mr. and Mrs. Frank Houck, Elverson RD2. He has served the Twin Valley FFA Chapter as sentinel in 1969-70, vice president in 1970-71, and president for 1971-72. Frank also served as president of the Methodist Youth Fellowship at Goodwill Church in 1971 and a member of the National Honor Society from 1970-72.

Frank has received many awards during his four years in vocational agriculture. In 1968 he was chosen as Star Chapter Greenhand. In 1969 he participated in the FFA Activities Week livestock judging contest, earning a silver medal.

In 1971 Frank received the Keystone Farmer Degree, placed sixth in yield in the Berks County FFA corn contest, and was second in the FFA Public Speaking contest.

As County president, Frank served as a delegate at FFA Week Activities Week at Penn State in June, 1971, serving as secretary of the Budget and Finance committee.

In the Berks County Swine Show and Sale Frank placed second in showmanship, sixth in fitting, and fourth and sixth in the weight classes. Frank was second in the County FFA Tractor Driving Contest at the Kutztown Fair, having also participated in the livestock judging contest.

Frank attended the National FFA Convention in Kansas City, Mo., as a representative of both the Twin Valley Chapter and the Berks County Association in October, 1971.

He earned first in quality and second in yield in the Berks County FFA Corn Contest in November 1971. In January, he served as Berks County delegate at the Pennsylvania Mid-Winter FFA Convention at Harrisburg.

At the Berks County FFA Banquet, Frank was chosen as the Berks County Star Farmer. He also received the Berks County Youth Leadership Award from the Berks County Elks Club in March, 1972. He also received the Keystone Farmer Degree in January, 1971.

He has received Foundation Awards in livestock farming, crop farming, public speaking and chapter scholarship.

His farming program has included approximately 800 head of hogs, two beef cattle, five horses, 38 acres of field corn and 14 acres of wheat in the past three years.

After graduation, Frank plans to work at home for one year, then attend Penn State University majoring in agriculture education. He also hopes to receive the American Farmer Degree.

Frank is the seventh DeKalb Accomplishment Award winner at Twin Valley. His name will be engraved with the other winners on a special plaque provided by the sponsor.

Chapter Reporter,
Richard Kurtz

Judging Training Session

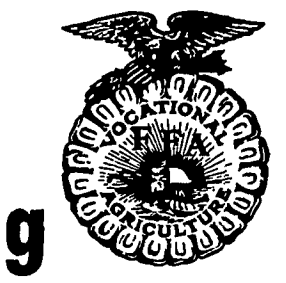
Scheduled at Penn State

An all-day Livestock Judging Training Session for non-Extension judges of beef cattle, sheep and hogs has been scheduled for May 24 at the Swine Center on the Penn State University campus, under the direction of Extension .vestock specialists. Several classes of each species of livestock will be judged and discussed.

A number of local men, recognized for their judging abilities, have been invited to participate in the training session. They include: Fred Frey, Quarryville RD2; Mark Nestleroth, Manheim RD3; Sam Wylie III, Quarryville RD2; Gene Spangler, Oxford RD1; C. Warren Leininger, Denver RD2; Joe Little, Quarryville RD3; Jim Horton, Masonic Homes, Elizabethtown; John Henkel, Strasburg RD1, and Larry R. Weaver, New Holland RD1.

From Local Ag Teachers:

Thoughts in Passing



Lew Ayers
Agriculture Instructor
Ephrata Area High School

Editor's Note: The timely article this week was prepared by Lew Ayers, agriculture instructor at Ephrata Area High School.

Lawn Mower Safety

Each year hundreds of people are injured by power lawn mowers. Careless operation of power mowers can result in lost toes, fingers and other injureis.

Unfortunately, children are the ones that have accidents more often than adults. Parents should provide proper safety instruction to their children before allowing them to mow the lawn. Above all, parents should set an example of safe operation with all types of power equipment.

The blade of a rotary mower has the power to throw rocks, sticks, and other objects at very high speeds for distances of 50 feet or more. Rotary mowers are also very dangerous to use on wet, slippery, or steep lawns.

Always maintain the mower by checking all bolts and nuts, guards, and other parts to be sure they are tight. Stop the engine and disconnect the spark plug wire before checking or working under the mower. When starting the mower keep feet well away from the blade and never stand near the discharge opening.

Other important safety rules to follow include:

—Stop the engine whenever you leave the mower, even for a moment.

—Never add fuel to a running engine.

—Keep children out of the yard when mowing.

—Never allow anyone to ride the mower with you—it was made with one seat.

—Be extremely careful when using mowers on slopes—never mow up and down; if you slip, your feet and hands can be injured quickly.

—Do not over-speed the engine or alter governor settings. Excessive speed is dangerous and can shorten mower life.

—Stop the engine before pushing mower across drives, walks or roads.

—Never leave a starter in the cocked position.

—Disengage clutches and shift into neutral before starting engine.

—Above all, know your controls—learn to engine quickly in case of an emergency.

Power mowers are designed to provide the ultimate in safety and efficienty However, as with any type of power equipment, carelessness or error on the part of the operator can result in serious injury. Power mowers, particularly the riders, have increased horsepower, more attachments and controls than every before. It becomes more important that you know the controls and how they work.

Let's think safety with power mowers this summer

FFA Week

(Continued From Page 1)

Grassland Chpater; Solanco Chapter, and Oxford Chapter.

Both Manheim Chapter and Cloister Chapter are eligible to compete at Penn State during FFA Week.

The contest consisted of a written test on small gas engine operating and repair, use of the small gas engine service manual, and trouble shooting and engine to find and repair faults.

Agriculture teachers from the participating schools served as judges.

Dairy Products Contest

Twenty-six youth were entered in the Lancaster County Dairy Products contest hosted by Penn Dairies, Lancaster.

In this contest, contestants worked singly and judged these areas. detecting off-flavors in seven milk samples; scoring seven sediment pads on severity of sediment, and scoring seven milker heads for defects.

Donald Unger, Solanco Chapter, son of Mr. and Mrs. Harry R Unger, Nottingham RD2, placed first. He was presented a trophy by Penn Dairies.

This is typical of the six holes used for the Land Judging Contest on Thursday — except that this one was filled with water from heavy rains the night before the contest. These boys, representing various FFA Chapters, are prepared to enjoy the hot sun as they judge the land type on this section of the Harold Kready, Manheim RD2, farm.

Other winners included: JoAnn Kauffman, Solanco Chapter; Ken Groff, Grassland Chapter; Leonard Martin, Cloister Chapter; Glen Gerhart, Cloister Chapter; Elvin Hursh, Grassland Chapter; Dennis Nolt, Grassland Chapter; Barry Wissler, Cloister Chapter; Dale Spangler, Solanco Chapter, and Ben Rice, Solanco Chapter.

Others participating were from Manor Chapter, Oxford Chapter, and Red Lion Chapter.

Dr. Charles Livak, head of quality control at Penn Dairies, served as judge. Following the contest he explained his reasons for placing samples in the various positions to the contestants.

This contest is designed to allow the participating schools to determine who would represent their Chapter in the State contest.

Land Contest

The Lancaster County FFA Land Use and Management contest was held Thursday on the farm of Harold Kready, Manheim RD2. The Manheim FFA Chapter was in charge of setting up the contest.

For the judging event, six areas were set up representing various soil types. A total of 100 points could be scored on each area, for a total of 600 points.

High individuals placing in the event were: Nelson Messner, Grassland Chapter, 498 points, first; David Smeltz, Grassland Chapter, 441, second; John Herr, Solanco Chapter, and Mike Bollinger, Cloister Chapter, tie for third with 433.2; Mike Roland, Solance, 425.6, fifth; Marlin Smoker, Cloister Chapter, 421.2, sixth; Philip Kinsey, Solanco Chapter, 415.4, seventh; Eric Zeiset, Grassland Cahpter, 403.2, eighth; Rick Burkholder, Manor Chapter, 402.7, ninth, and Tom Martin, Grassland Chapter, 394, 10th.

The top team was New Holland's Grassland Chapter. They scored 2,126 points out of a possible 3,000.

Schools participating were: Ephrata, Manheim, New Holland, Oxford, Penn Manor, Pequea Valley and Solanco. A total of 45 students were in competition.

Judges were Orval Bass, district conservationist, and Edward Tompkins, Area 4 soil scientist, USDA, Soil Conservation Service.

The Lancaster County Soil and Water Conservation District presented a plaque to Messner.

National Angus Heifer Show Deadline June 1

Entry deadline for the National Junior Angus Heifer Show, set for July 13-14 at the Cass County 4-H Fairgrounds in Logansport, Indiana, is June 1.

Dean R. Hurlbut, director of Junior activities for the American Angus Association, reports, "This is two weeks earlier than last year and means that only entries postmarked on or before June 1 will be eligible to show in the national contest."

A special highlight of the show again this year will be the National Junior Angus Judging Contest.

Heifer show entries should be mailed to the Junior Activities Department, American Angus Association, 3201 Frederick Blvd., St. Joseph, Missouri, 64501, before June 1.

Consultant, National Dairy Council

FOOD FROM VENDING MACHINES

One of today's phenomena is the vending machine. It's estimated that nationwide there are over 5 million such machines in use. They are "silent salesmen" ready day or night to sell their products to you.

How popular are vending machines? It's said that people all over this nation drop nearly 200 million coins into vending machines every 24 hours. That's about 139,000 coins a minute, or 2,300 every second.

Machines Influence How We Eat

It's obvious to us all that vending machines have become increasingly involved in what the nation eats — and how it eats. What this means is the vendor has a responsibility to offer a balance of foods. And the consumer as always owes it to himself to choose wisely what he eats. There's no question that both the consumer and the vendor have a long way to go. But improvement is constant. You can, for example, meet the requirements of balanced four-food-group eating quite easily.

Take lunch at work: If you choose, say, a meat or cheese sandwich, plus hot vegetable soup and milk, you've done it. You've chosen from the meat or so-called protein group, the milk group, fruits and vegetables, and breads and cereals. Incidentally, did you know that vending machines indicate milk's popularity? Annual statistics say that more than 84,000 vending machines are in operation just dispensing milk. And on the average these machines each sell 230 half-pints of milk per week, or a total of almost I billion half-pints per year.

But vending machines, I have discovered, are not all that new. As early as 215 B.C., worshipers in temples could get holy water by dropping in five drachmas (a drachma today is worth about 74 cents). In 1615, coin-operated tobacco boxes appeared in English pubs. After a coin was inserted, the lid opened and the patron helped himself to a pipeful of tobacco. The real beginning of vending machines in this country was in 1888 when Thomas Adams installed tutti-frutti gum machines on the platforms of New York City's elevated trains. This prompted the vending of candy, nuts, and other items.

Refrigeration The Key

The perfection of refrigeration in the 1930's opened up new markets for milk, ice cream and soft drinks. Dispensing of hot food that is appetizing and nutritious soon followed. The list of foods now available from vending machines is long indeed. It includes hot and cold sandwiches, salads, soups, hot and cold drinks, (including milk), desserts such as ice cream and pies, fruits, nuts, sweet rolls, popcorn — you name it.

But remember, it's up to you to make sensible selections.

Lehman

(Continued From Page 1)

the Chapter, a current member of the Lancaster County Swine Producing Association, has lived on a farm all his life, loves animals and the outdoors. In other words, his whole life has been geared toward the farm and it is there he intends to earn his living.

"There is one other reason for my being a farmer," says Roger. "I can be my own boss. Success and failure depend on me, not someone else. I like it that way."

If the past is any mirror of the future, young Roger Lehman will someday be giving to his son the legacy given to him by his father and grandfather before him.

Announcing: a dry "pop-up"! Can cut planting time in half!

Ortho Unipel STARTER SPECIAL.

A starter? As a "pop-up"? It has to be special.

It is. STARTER SPECIAL is a completely unique product. Here's why:

— Physical Uniformity STARTER SPECIAL pellets are made to the same shape and density for maximum consistency and control in application.

— Chemical Uniformity. Each and every STARTER SPECIAL pellet has all three primary nutrients — nitrogen, phosphorus, potassium — chemically homogenized in precisely the most desirable ratio 13-34-10. The nutrients can't separate or segregate during handling as with troublesome, hard-to-regulate "dry blends"

— Double Duty Nutrients STARTER SPECIAL has both quick-acting and long-lasting nitrogen and phosphorus for thorough plant feeding There is no urea or diammonium phosphate that might endanger the seed through liberation of free ammonia.

Of course, these features also make it highly effective as a banded starter. But, with only slight adaptation of most planters, it can be applied directly with the seed in exacting measurement for safety and maximum response

With this kind of control, you apply much less material — only 1/3 the amount needed for banding And the reduced material handling could cut your planting time in half!

So, save time, trouble, and money at planting time. See us soon about applying STARTER SPECIAL this spring as a dry "pop-up".

Farmers Union Members Meet with Legislators on Red Meat Inspection

Custom farm butchers and operators of small slaughter houses have been given hope that the inspection of red meat in Pennsylvania will continue under state jurisdiction rather than be turned over to federal authorities on July 1.

A Pennsylvania Farmers Union group visiting the state capitol Wednesday was assured by legislative leaders of the House of Representatives that efforts would be made to restore funds to the state budget enabling State Department of Agriculture officials to continue their inspection program.

Meeting with the group were Representative Martin Mullen (Philadelphia), chairman of the House Appropriations Committee and Brady Ketrick (Mifflin County) chairman of the House Committee on Agriculture and Dairy Industries. Also present were Republican Kent Shelhamer (Columbia County), Republican Frank Kury (Northumberland County) and Republican Percy Foor (Bedford County).

Farmes and butchers serving local markets became alarmed about the inspection program when they learned that Governor Milton J. Shapp had eliminated funds for the service from his budget request for the coming year. The Governor's office said the decision to turn inspection over to federal authorities was made in an effort to save money.

The 20-man Farmers Union delegation disagreed with the Governor's contention by pointing out that taxpayers would pick up the cost of inspection at the federal level also. In addition, they expressed concern that federal inspectors would fail to use reasonable judgment in enforcing the stringent regulations, and that it would result in the shutdown of most small slaughterhouses. Farmers and consumers alike would be the losers, they maintained.

Northumberland County beef farmer Allen Deiter, who led the delegation, noted that local auction barns would also be forced out of business since they are dependent up on the small butcher. As a result, he said, the disappearance of the local auction would result in lower farm prices since farmers would be at the mercy of a few large meat packers. Consumers could expect to pay more, he said, because of the same lack of competition.

Wednesday's course of action grew out of a series of local Farmers Union meetings across Pennsylvania in recent weeks in which farmers were encouraged to identify their problems and do something about them. Guy Oakman of McConnellsburg, organization chairman of Pennsylvania Farmers Union, and Forney Longenecker of Lititz, director of organization, have been coordinating the events.

Benefit Auction

There will be an auction sale to benefit children at the Mennonite Children's Home on the Home premises, Millersville, at 10:30 a.m Saturday, May 27.

Among items to be sold will be items from the Children's Home, including ice cream parlor chairs, old school desks, and antique items.

Saleable items will be accepted up to the day of the sale. Larger items may be brought after May 22 up to day of sale Abe Diffenbach will serve as auctioneer

Loaded Guns Now Banned in Vehicles

An amendment to the Pennsylvania Game Law now prohibits the possession of a loaded firearm in a vehicle.

Previously, the Game Law prohibited having a loaded rifle or shotgun in a vehicle on or along a public highway, but the new amendment is much more inclusive and, ineffect, bans loaded firearms of any description from all vehicles anywhere in the commonwealth, with few exceptions.

Under the amendment, a "firearm" is defined as an instrument used in the propulsion of shot, shell, bullet or any other object by the action of gun powder exploded, explosive powder or he expansion of gas therein.

The term "firearm" will include all rifles, shotguns, revolvers, pistols, gas-powered and pneumatic pellet guns, B-B guns (except spring operated), etc.

A firearm is defined as being "loaded" if there is a cartridge or shell or projectile of any description in either the firing chamber or the magazine of the gun.

Some hunters remove the cartridge or shell from the firing chamber but leave one or more cartridge (s) or shell (s) in the magazine, thinking that the gun is "unloaded." This is not the case All shells or cartridges must be removed from the firing chamber and the magazine before the gun is legally "unloaded"

A loaded firearm may not be in or on any vehicle or conveyance (including a snowmobile) or its attachments while standing, or being driven, within the commonwealth.

A sportsman who has a permit issued by a county treasurer for the purpose of carrying a handgun for hunting or fishing may not, under the amendment, have the handgun loaded in a vehicle under any circumstances.

The Game Law amendment does not apply to a person authorized to hunt or trap without a license when the person is on lands on which he resides, such as a farmer.

Introducing Richard Hider, Mount Joy Horticulture Teacher

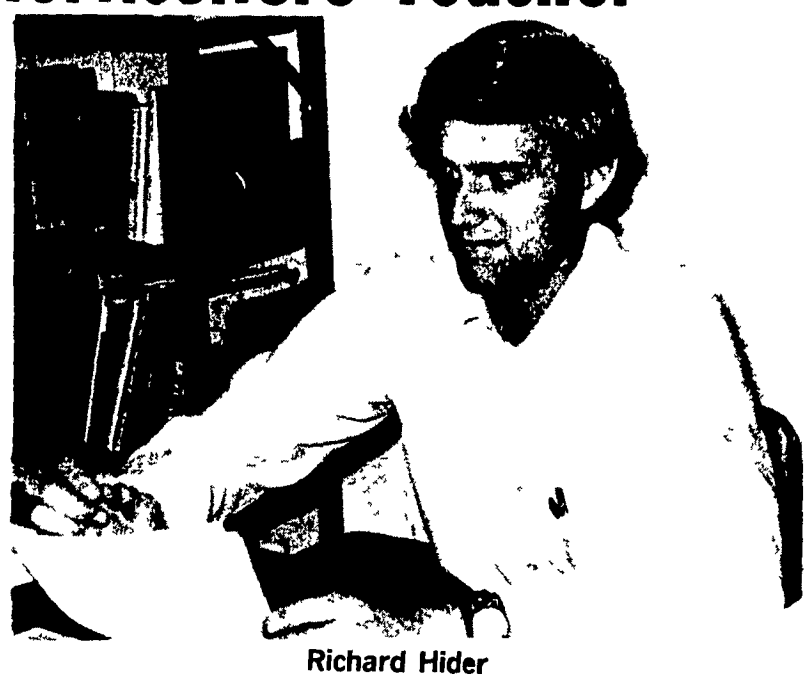
There is a new face among the teachers of agriculture in Lancaster County.

Richard Hider, originally from Glen Ridge, N.J., began teaching horticulture in the Mount Joy Vo-Tech School in February of this year. He recently graduated from Delaware Valley College of Science and Agriculture, where he received a BS degree in ornamental horticulture. Hider replaced William Mitchell, who is now teaching near Balitimore.

An enthusiastic new teacher, Hider says he likes vo-tech teaching. He admits he didn't know anything about Vo-Tech schools until he hit college life, and he liked the idea.

Currently he teaches 17 students on the 11th and 12th grade levels. There are three girls enrolled in the course he is teaching. The group is concentrating efforts in Turf Grass Culture this spring.

There are a lot of ideas for future teaching and learning areas lurking in the shadows Hider and Dan Helwig, also a horticulture teacher at Mount Joy Vo-Tech, hope to put into practice. Some of the ideas are a golf course, an arbitorium, nature trail, and pond area. There are approximately 105 available acres for the departments to use surrounding the Vo-Tech School.



Richard Hider

Hider and Helwig are co-advisors of Plants Unlimited, the FFA Chapter operating for students enrolled in the Vo-Tech program. Meetings are held twice a month.

Hider will be married in June to Miss Susan Goranson, who is an elementary teacher presently teaching in Florida. They will reside in Mount Joy.

For hobbies, Hider lists gardening, which is how his interest in horticulture began, water sports, and "generally fooling around and dabbling."

We've questioned everyone from you to your uncle's second cousin.

"Tell us how you'd do it."

We've made the request uncountable times, in recent weeks. On your street or where you work.

You've seen it on lapel buttons, on posters displayed in our bank's windows. And you've read or heard it in our newspaper and radio advertising

Our purpose has been to learn how you'd operate a bank. For, after all, you're the one who'll benefit from better, more personal bank services. And you alone will decide which bank to favor with your business.

When all the suggestions are in, we plan to think about them, talk about them—and then do something about them.

Why? Because we think that's how you'd do it.

Farmers National Bank of Quarryville
Banking the way you'd do it.

Mrs. Robert Lefever

Her Family Really Celebrates "National Hospital Week"

Mrs. Charles McSparran
Farm Feature Writer

Last Sunday was Mother's Day and last week was National Hospital Week. Mrs. Robert (Anna) Lefever, Manheim RD2, qualifies in both categories. She is a mother of four daughters and two sons. All four daughters graduated from Lancaster Mennonite School. Three are registered nurses. One is a medical secretary and her husband is in training to become a nurse.

Mr. and Mrs. Lefever's oldest daughter, Ella, trained at Lancaster General Hospital. After graduation she spent three years in voluntary service at Twillingate, Newfoundland. She worked there two more years, then married Galen Peters of Kansas. They lived two years in Iowa They now live in Greenville, Illinois where Galen teaches at a Methodist college. They have two daughters and a son

Florence trained at the Reading Hospital. She worked at the Oreville Mennonite Home three years after graduating and has nursed the past three years at the Osteopathic Hospital in Lancaster She lives at home. She mows the lawn and does the trimming She says "I love to drive the tractor." She works the ground for her dad. She used to plow, help harvest and just about any farm job

Vera also gradauted at the Reading Hospital school of nursing She worked there a year or two, then married Raymond Kurtz of near Reading They live on a 200 acre dairy farm at Shoemakersville in Berks County They keep about 50 cows They have mostly Holsteins but have some Guernseys. They have two sons

Mary went to Medical Secretary School in Hagerstown, Md and is a medical secretary at Philhaven Hospital in Lebanon County She is married to Leroy Beitzel who is in nurses training at the Harrisburg Hospital

Martin is the third oldest of the children He married Norma Jean Book of East Petersburg. They live in New Jersey where he is employed with Green and Company, who make metal things to order. His job takes him far and near by plane. They have a son and a daughter.

James, 15, is the youngest of the family. He attends Lancaster Mennonite School and Willow Street Vocational Technical School where he is taking an electrical appliance course. He enjoys fixing all kinds of appliances.

Mrs. Lefever, besides being a busy homemaker and mother, has been baking and decorating cakes to sell for thirty years. It started just as a hobby with baking and decorating cakes for her family. Then, as a favor for a friend, she baked an anniversary cake, then a wedding cake. And so it went, by word of mouth, till now she bakes on the average of 15 or more large cakes a week. She doesn't advertise. She sells just from her home. Sometimes she turns away as many as she bakes. She says "I enjoy doing it and it's hard for me to say no." She has cakes booked now till August.

Mrs Lefever bakes whatever kind of cake her customers desire, however, her specialty is angel food She also makes chocolate, banana, chiffon, spice, devils food and yellow cakes. Her cakes do not come from a box but are made from scratch. She had a tinsmith make pans of various sizes for her

She never had any training in cake decorating but has cultivated a natural talent. She makes gorgeous cakes of every description She has quite a trade for sympathy cakes. Many people give a decorated cake to a family at the time of bereavement, in lieu of flowers, to express their sympathy Mrs. Lefever writes a beautiful poem on the page of an open book and places a spray of colored flowers on the other page. She makes the prettiest baby shower cakes in the shape of a bassinet and puts a doll in them.

She puts bride and groom, bells and real flowers on top of the wedding and anniversary cakes according to the order. Many people buy a small tier cake then have her make circle decorated cakes to match, marked for serving a certain number of people, which are easier to cut and serve. She knows exactly how many pieces each size cake will serve. She delivers some of her cakes and puts them in place.

Mrs Lefever buys 15 to 30 dozen eggs a week for baking. She sells egg yolks by the quart to someone who makes noodles. Sometimes she sells four of five quarts of yolks a week.

Here are recipes for some of Mrs. Lefever's cakes, also a recipe for icing she uses.

Angel Food Cake
(9 inch tube pan)

1½ cups egg whites
¼ teaspoon salt
½ teaspoon cream of tartar

Beat till stiff but not dry with an electric beater. Gradually add 1½ cups granulated sugar, folding in rather than beating.

Fold in:
½ teaspoon vanilla
½ teaspoon almond extract
1½ cups sifted cake flour

Put in tube pan and bake at 300 degrees for 1 hour. For a 13½ inch tube pan, use 3 cups of egg whites and for a 16 inch tube pan use 4 cups egg whites and other ingredients in proportions to the basic recipe above.

xxx

Spice Cake

Measure in sifter and sift into bowl:
2½ cups cake flour
1 cup granulated sugar
1 teaspoon baking powder
1 teaspoon baking soda
½ teaspoon salt
¾ teaspoon cinnamon
¾ teaspoon cloves

Add:
½ cup shortening
1¼ cups sweet or sour milk

Mix and add:
2-3 cups light or medium brown sugar
2 eggs.

Beat. Makes two 9 inch layers. Bake at 350 degrees for a half hour or till done.

xxx

Chocolate Cake

2 cups cake flour
2-3 cups cocoa
1 2-3 cups white sugar
½ teaspoon salt
1¼ teaspoons baking soda
1¼ teaspoon baking powder

Sift all above ingredients into bowl. Add:
1 1-3 cups water
2-3 cups vegetable shortening

Beat till well mixed. Add:
1 teaspoon vanilla
3 eggs

Beat till thoroughly mixed. Put in two 9 inch cake pans. Bake at 350 degrees.

xxx

Icing

¼ lb. or 1 heaping tablespoon Crisco

Mrs. Robert Lefever, Manheim RD2, decorating an anniversary cake.

1 lb. 10X sugar
½ teaspoon flavoring
Coloring if desired
Enough milk to moisten to proper consistency

Mix with electric mixer.

xxx

Here is a recipe for a one-dish meal that you don't have to use immediatly. It can be reheated and served quickly. It can be frozen for later use.

Chili Con Carne

Cut up a large onion and brown in butter. Add 1 pound hamburger. Stir and cook till not red. Add 1 quart tomato juice. Add 1 rounded teaspoon salt. Cook slowly about ½ hour. Add 1 pound can of kidney beans. Break up about ½ pound spaghetti and cook slowly till soft with lid off. Add water if necessary. Add ¼ teaspoon chili powder last. Allow about 1 hour or longer to make. Stir occasionally.

xxx

Mrs. Lefever makes chocolate covered mints and decorates them with tiny flowers and leaves. At Christmas time she puts three holly leaves or poinsettias on them. She gives these to relatives and friends.

She bakes a lot of Christmas cookies. She used to make hundreds of dozens to sell but now sells only about 100 dozen because she has too many other things to do. She makes 10 or 12 kinds. Florence helps some with cookie baking.

Robert was born and raised east of Lancaster. Mrs. Lefever, the former Anna Brubaker, was born and raised in Manor Township. She went to school in Manor Township and Neffsville. They lived on a farm on the Fruitville Pike before they moved to their present farm. They had cows, chicken and pigs. The first two years they were married they had part of a market stand and sold eggs, vegetables, cakes and cookies.

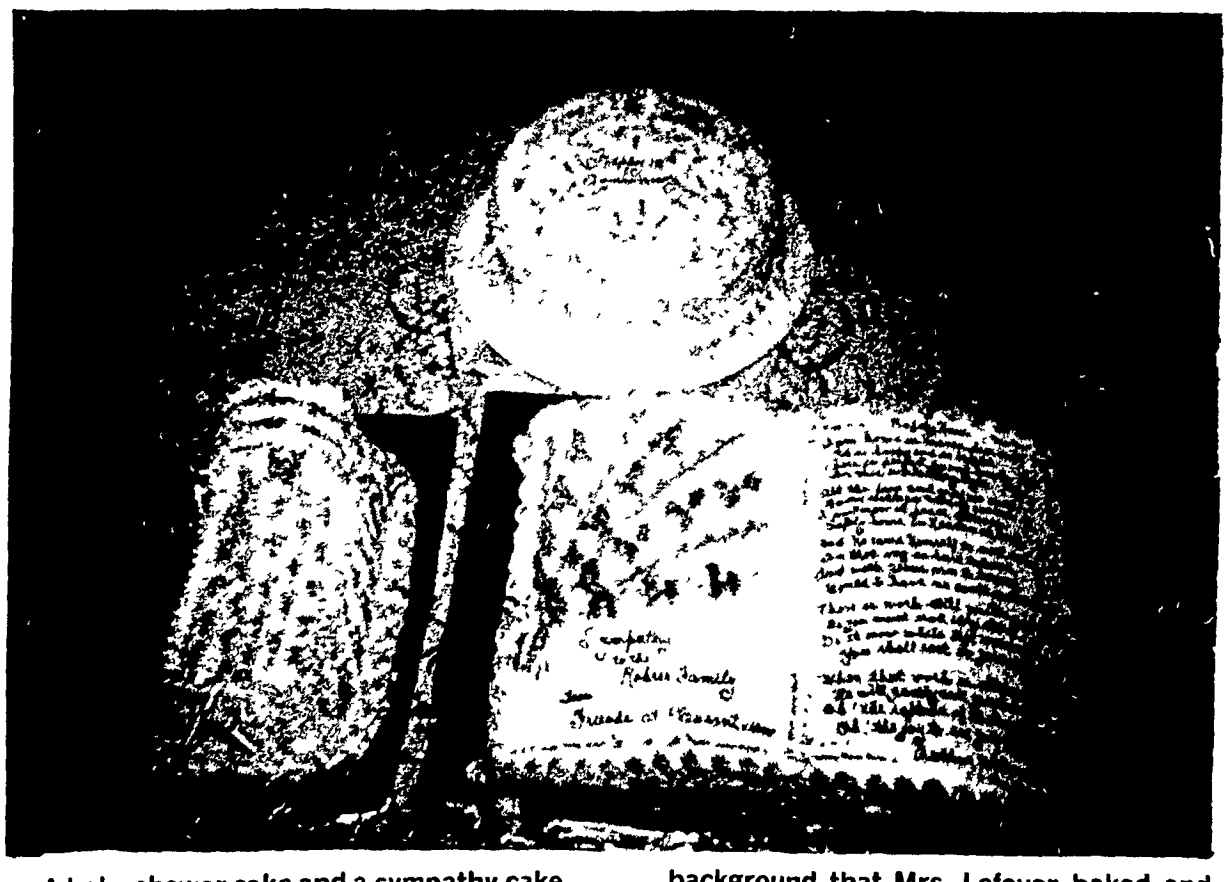
They have lived on their 100 acre farm on Hossler Road, near the Mount Joy Road, for 22 years. They used to have cows, pigs and chickens and also raised tomatoes and carrots for cash crops. Mrs. Lefever helped out on the farm a lot then. They do not have livestock now and get some custom work done. They raise corn, barley and wheat.

Their beautiful old stone house was built in 1803. Mrs. Lefever has several flower beds of beautiful perennials and annuals which she tends to.

Lefevers are members of Kauffman's Mennonite Church, between East Petersburg and Manheim. Robert and Florence used to teach Sunday School classes and Mrs. Lefever helped in the primary department. She was also in the home department and saw that the sick were remembered with flowers. Florence used to be librarian also. Mrs. Lefever helps at the Clothing Bank on the third block of S. Duke Street, Lancaster, the first Wednesday of each month.

Although Mrs. Lefever does not belong to organizations other than the church she donates cakes to the Manheim Fire Company for their bakes, dinners and carnivals. She also donates cakes to the Farm Women. She used to exhibit cakes at the Manheim Community Farm Show. She still exhibits flowers and ferns.

Mrs. Lefever says she enjoys cooking very much. She doesn't have as much cooking to do since her family is smaller. She does her own housework, usually the first part of the week when she isn't baking cakes. With June weddings just around the corner Mrs. Lefever will be busier than ever.



A baby shower cake and a sympathy cake with an anniversary cake in the background that Mrs. Lefever baked and decorated.

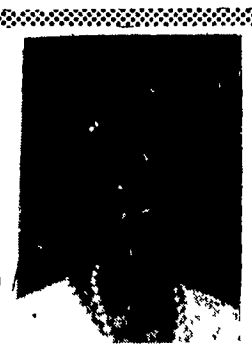
Ladies, Have You Heard?



Doris Thomas

By Doris Thomas,
Extension Home Economist

Chicken: Feature of the Month

Chicken is the highlight of the U.S. Department of Agriculture's Plentiful Foods List for May, and prospects are good for a plentiful supply at attractive prices.

And speaking of chicken, fried chicken is always a sell-out at mealtime. To keep the coating on the disjointed pieces throughout cooking, it's best to first roll the pieces in seasoned flour. For each two pounds ready-to-serve chicken, allow ½ cup flour, 1 teaspoon salt, and a dash of pepper. Then dip the pieces in a mixture of 1 egg and 2 tablespoons water (or milk or sour cream), beaten together until frothy. Next, roll in one of these crumb coatings:

...½ cup packaged dry bread crumbs

.. ½ cup bread crumbs and ½ cup grated Parmesan cheese

...1 cup crushed cornflakes

1 cup crushed cornflakes, one ¼ cup grated cheddar cheese

...1 cup crushed soda cracker crumbs, 1 teaspoon poultry seasoning, and ½ teaspoon curry

...½ cup cornmeal and ½ cup flour

...¾ cup pretzel crumbs (if presalted, eliminate salt in flour).

Then just proceed to fry, either in the oven or in a pan on top of the stove. To oven-fry, you place the pieces in a single layer on a baking pan and bake in preheated 400 degree F. oven about an hour, turning every 15 minutes. To pan-fry, melt ½ cup butter, margarine, or fat in a deep frying pan and saute pieces until golden on all sides. Reduce heat and cook slowly until uniformly browned and fork-tender, about 30 to 40 minutes.

Here's a recipe for another delicious type of chicken:

Chinese Style Honeyed Chicken

Two 2-½ lb. frying chickens, disjointed
2 eggs
¼ cup melted butter or margarine
¼ cup soy sauce
¼ cup lemon juice
½ cup honey
Seasonings, to taste

To Prepare:

Arrange chicken pieces in shallow baking pans. Beat eggs slightly. Add melted butter, soy sauce, lemon juice, honey and seasonings to eggs. Mix well. Pour sauce over chicken, turning pieces to coat. Bake uncovered in slow 300 degrees F. oven for one hour, or until done, turning and basting once. Delicious served hot or cold.

"Red" or "Dark" Chicken Bones Safe

Because of concern expressed by many people about the "redness" or "darkness" around bones of cooked poultry, the U.S. Department of Agriculture's Animal and Plant Health Inspection Service offers reassurance to the public that such birds are safe to eat.

The characteristic is simply an indication of a very young, tender bird. Broiler-fryers are now brought to market in about one-half the time (7-10 weeks) of several years ago. Because the birds are raised quickly, their bones have not matured and are very soft and porous.

When the poultry is cooked, sometimes the pigments from the marrow of the soft bones seep through and cause the meat next to the bones to become dark. This is in no way harmful.

All Nature Smiles

IN Spring nature casts aside the drab garb of winter, buds burst and spread fresh, vibrant color up and down the land. All nature smiles. In such a setting a paint-needy house looks drab and dreary.

A fresh coat of paint will give your house a "springlike" appearance. It will smile, too.

Farm Women Societies

Society 9

Farm Women Society 9 heard Micc Connie Campbell, Millersville, as guest speaker at a meeting of the Society at the home of Mrs. Marguerite Kreider, Conestoga. Mrs. Oram Hagen and Mrs. George Brinely were assisting hostesses. Mrs. Mabel Heller led devotions.

Miss Campbell, granddaughter of Society 9 member Mrs. Helen Campbell, spent a year in Peru as an exchange student. She showed slides and told of her adventures in a foreign country.

Society 9 members will be guests of Society 26 at a meeting in the Wenger Clinic, Lititz Pike, at 7:30 p.m. May 25.

The next regular meeting of Society 9 will be held at 1:30 p.m. June 8 at the home of Mrs. Esther Huber, Marticville.

Society 10

Farm Women Society 10 heard Mrs. Edward K. Knettler, Neffsville, present a talk on Chinese mothers at a meeting held in the home of Mrs. Elam Buckwalter, 20 Princess Avenue. Miss Frances LeFevre led devotions.

Mrs. Knettler, who spent several years in China engaged in missionary work, told of Chinese marriage customs still held by some of the upperclass families. She pointed out that among these families, it is customary for the mothers to arrange an engagement when the children are very young. When the couple becomes of age to marry, the wedding is arranged. It is believed that the couple will learn to love each other after the wedding on a kind of "marry now-love later" arrangement.

During the business portion of the meeting conducted by Miss Ida P. Kunkle, president, a gift of $50 was approved for the 1972 County Farm Women project, LARC.

In other business, the group decided to hold an annual miscellaneous auction each October with all members participating. The monthly auction of a few articles will continue.

The next meeting will be held June 3 at the Farm and Home Center Extension kitchen. Members of Society 24 will be guests at a luncheon meeting.

Society 11

Farm Women Society 11 met recently at the home of Mrs. Paul Nolt, Lancaster. The meeting was opened with devotions conducted by Mrs. Nolt, followed by the Salute to the Flag.

Roll call was answered with thoughts of safety in the home. An auction was held.

Regular business consisted of reports from the chairmen of the different interests of County and State Farm Women projects.

A talk on the local crime situation as well as organized crime was given by Edward Snyder of the Lancaster Police force.

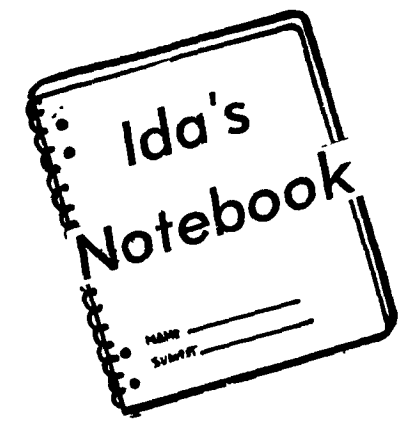
In the evening, Society 11 was entertained by Society 28 at Strasburg Fire Hall. Slides and a lecture were given by Mrs. Esbenshade, who had recently returned from a trip to Japan and Formosa.

Society 13

Farm Women Society 13 met at the home of Mrs. Merrill Miller, 1668 Old Philadelphia Pike, with Mrs. Floyd McCleneghan serving as cohostess.

For the devotional period Mrs. McCleneghan read a humerous poem honoring Mothers and Mrs. Miller read appropriate scriptures for Mother's Day.

(Continued On Page 26)



Ida Risser

This morning the Conestoga is bank-full and very muddy. We did not have rain yesterday but someone else certainly did. It is interesting to note that our creek drains all of Northeastern Lancaster County.

If you live along any of these streams, the water eventually flows past our meadow — the Muddy Creek, the Black Creek, the Middle Creek, the Cocalico Creek, Indian Run or Groff's Creek. Even the Conestoga Creek drains land as far away as Churchtown where it originates.

In regard to its ever-flowing presence, I often think of this quote: "Men may come and men may go, but I go on forever."

xxx

This past week my son forgot a notebook which, he declared, just had to be at school that day. So I chased the bus the whole way to Neffsville, five miles away.

Little did I realize what I was letting myself in for. At the Middle School, I was immediately surrounded by buses and more buses unloading literally hundreds of children all about his size. I looked for a maroon jacket but none belonged to him.

So I hastily tucked my apron under the car seat and walked into the office, hoping all the while that no one would notice the holes in my stockings. As I caught the eye of the principal, I was saved from standing at the end of a long line of pupils. He assured me Philip would get the notebook and true to his word, as I approached my car, I heard his name booming over the loudspeaker.

What happened was that I actually got to school before he did and his teacher had to tell him he was wanted at the office.

How things have changed since my sixth grade class took up one row of one room in that old brick school house. And if I'd forgotten my notebook it simply would have stayed at home all day while I suffered.

"Harvestore high moisture corn cut our purchased feed costs in half and we now milk twice as many cows . . .

It used to cost us $800.00 per month for custom grinding and adding protein for 80 cows. Purchased feed for 160 cows is now only $400.00 per month. We are getting better production and our cows are in better flesh. We have just common cows but Harvestore feeds have brought our test up to 4.0% from 3.5 to 3.6%."

Farm Women Societies

(Continued From Page 25)

Mrs. Irwin Leaman, vice president, conducted the business meeting. Roll call was answered by naming the most unusual visitor you ever had in your home.

Members were asked to make a covered dish for the family of a hospitalized member.

Members will sell refreshments at the Martin R. Bare household sale May 27.

Guest speaker was Mrs. Amos Esh, Holtwood RD2. Her subject was "Total Womanhood."

The next meeting will be held June 9 at the home of Mrs. John Miller, 1686 Lincoln Highway East Mrs. William Schroeder and Mrs Claude Miller will serve as cohostesses.

Society 14

Farm Women Society 14 held its Mother and Daughter Banquet at the Akron Restaurant last week Roll call was answered by giving childrens names and what they are doing

Hostesses were Mrs Ira Herr, Mrs Henry Rohrer and Mrs. Ellis Esbenshade

The program featured Elizabeth and Janet Kreider They showed pictures, with appropriate background music, of their trip to the Holy Lands.

The next meeting will be a food sale at the home of Mrs. J Paul Hostetter, Strasburg RD1, at 7:30 p m June 15

Society 18

Farm Women Society 18 met last week at the home of Mrs. Ralph Martin, East Petersburg. Devotions were led by Mrs Lewis I Mengle

The business session was conducted by Mrs. David E. Buckwalter, president. Announcement was made that Society 18 will be guests of Society 4 at 12 30 p m Saturday, May 20, for a luncheon in the Hempfield United Methodist Church

A demonstration on "Decoupage" was presented by Mrs Norman Shenk.

The next meeting will be June 17 at the home of Mrs Harry E Shephardson, Landisville

Society 24

Farm Women Society 24 hosted County officers and members of Society 7 at a meeting at the Conestoga Church of the Brethren, Leola.

The Rev. and Mrs. Earl Ziegler, Quarryville, presented a musical narrative illustrating three phases of life for a woman. The Rev. Mr. Ziegler is pastor of the Mechanic Grove Church of the Brethren, Quarryville. The skits presented highlights in the life of a woman as a girl in her youth, the middle years of motherhood, and the mature, but never old, woman.

Eleven members attended the Spring Rally at Seven Springs in Somerset County for Farm Women of Pennsylvania.

The next meeting will be held at 7:30 p.m. May 31 at Elen's School of Charm and Self Improvement, 131 East Chestnut Street, Lancaster.

Society 25

Farm Women Society 25 members entertained Society 8 members at a covered dish luncheon at the Conestoga Methodist Church. Trooper Edward Rowlands, representing Traffic Safety Education, presented a film, "Anatomy of an Accident" and spoke on the three C's of defensive driving.

The business meeting was conducted by Mrs. John Metz, president. Devotions were led by Mrs Melvin Groff, Lancaster RD6.

A bake sale was held this week at Two Guys.

Members of Society 25 will be guests of Society 11 at noon May 25 at Mechanics Grove Church.

The next meeting will be held at the home of Mrs. Richard Gregory, Conestoga, on June 10. Mrs. Howard Cramer, Martinville, will show and tell the Society about Ceramics.

Society 27

Farm Women Society 27 enjoyed a bus trip Tuesday to Longwood Gardens and the Winterthur Museum.

The next meeting will be a family picnic at 12 30 p.m. June 25 This will be in the meadow of Mr. and Mrs. Galen Benner, Mount Joy RD1

Society 29

Farm Women Society 29 entertained Society 12 members at the Elizabethtown Church of the Brethren recently

The program featured the four seasons of the year. Members and guests were seated at the appropriately decorated tables corresponding with their birthdays. Entertainment, in the form of games, skits, readings and singing, was provided by each seasons group.

During the businesss portion of the meeting Mrs. Eugene Wenger was installed as a new member.

Hostesses for the evening were Mrs. Harold Enders, Mrs. J. Robert Herr, Mrs. Jay Bixler, Mrs. Larry Sawadsky, Mrs. Dennis Drager, Mrs. Robert Denlinger, Mrs. Jack Garner and Mrs Eugene Wenger.

The next meeting will be at 7 p m June 19 when members will entertain patients at the Elizabethtown Crippled Children's Hospital

Representing Lancaster County in the 4-H dairy judging contest at the Penn State Dairy Exposition were: left to right, Lynn Royer, Robert Hess, Marlene Harbold and Larry Aaron. The team was accompanied by N. Alan Bair, Lancaster County ag agent.

Lancaster County 4-H Team Wins Dairy Judging Contest

Gary Dean, newly elected 4-H County Council president, receives the mallet from Peggy Hamilton, past home economics 4-H County Council president.

Each year the Penn State Dairy Science Club, a student organization at Penn State, holds a dairy judging contest in conjunction with its annual Dairy Exposition. 4-H teams as well as FFA teams from all counties of Pennsylvania are invited to judge in the contest in their respective categories

This year's contest, held on May 6, was dominated by the Lancaster County team As was reported by Randy Schultz, contest chairman, at the awards banquet Saturday evening, May 13 at Penn State, the Lancaster County 4-H won their division by a large margin.

The team members were: Larry Aaron, Quarryville; Marlene Harbold, Elizabethtown; Lynn Royer, Lancaster; and Robert Hess, Jr., Strasburg.

Individual honors went to Marlene Harbold for being high individual in both the Jersey and Brown Swiss breeds. Larry Aaron was second high individual over all in the 4-H contest.

Of the twelve 4-H teams participating in this year's contest, following Lancaster's team in first place was Mercer County, second, and Lebanon County, third.

County Council Elects Gary Dean President

New officers were elected at the reorganization meeting of the 4-H County Council Monday night at the Farm and Home Center.

Elected to serve for the following year were:

Gary Dean, Strasburg RD1, president; Cindy Balmer, Lititz RD4, co-president; Ann Spangler, Marietta, corresponding secretary; Roxanne Stein, Mountville, recording secretary; Mike Peifer, Manheim RD1, treasurer; Rob Hess, Strasburg RD1, parliamentarian; Sue Irwin, Lancaster, and Linda Stoltzfus, Mount Joy RD1, public relations.

The meeting began with a get-to-know-each-other game called "The Whole 4-H You"

The business meeting concerned the 4-H car wash last week at Wolf Motors; entertaining an Exchange group from North Carolina, and the 4-H play "Life of the Party" May 26 and 27 at Conestoga Valley High School.

The next County Council meeting will be at 8 p.m. June 12 at the Farm and Home Center

Lincoln Community 4-H Club Sees Film

The monthly meeting of the Lincoln Community 4-H Club was held at the Mt. Airy Fire Hall Tuesday night

Kerry Boyd gave a demonstration on "Management of your 4-H Feeder Pigs."

A film was shown, "Realm of the Wild"

The next meeting will be held June 20 at the Glen Wissler farm, Ephrata RD1

4-H Guernsey Club Discuss Dairy Judging

The third meeting of the 4-H Guernsey Club was called to order by Dave Bitler, president.

Alan Bair, assistant Lancaster County ag agent, discussed the fundamentals of judging dairy cattle. Members of the Club then participated in a practice judging situation of three classes with Mr. Bair as official judge.

The regular meeting procedures were then held. Mr. Bair stressed the fact that all show animals should have their hooves trimmed and be halter broken early.

Refreshments were enjoyed by all.

Chester County 4-H'ers Participate in State 4-H Capitol Days

Chester County 4-H members were among participants from the 67 Commonwealth counties to call upon area legislators in Harrisburg last week to learn more about the functions of government during State 4-H Capital Days.

Those participating in the two-day citizenship conference were:

Pam Taws, Paoli; Cindy Tompkins, Kennett Square, Dale Nafzinger, Spring City, and Daniel Weinstock, Phoenixville.

Senators and Representatives were guests of the County delegation at a legislative breakfast. Joining the Chester County 4-H members for breakfast were Senator John Stauffer, Phoenixville, and Representative Richard Schulze, Malvern. At this function the members and lawmakers had an opportunity to discuss local issues.

This citizenship activity is sponsored by Pennsylvania State University and the Chester County Cooperative Extension Service

1972-Crop Soybean County Loan Rates Announced

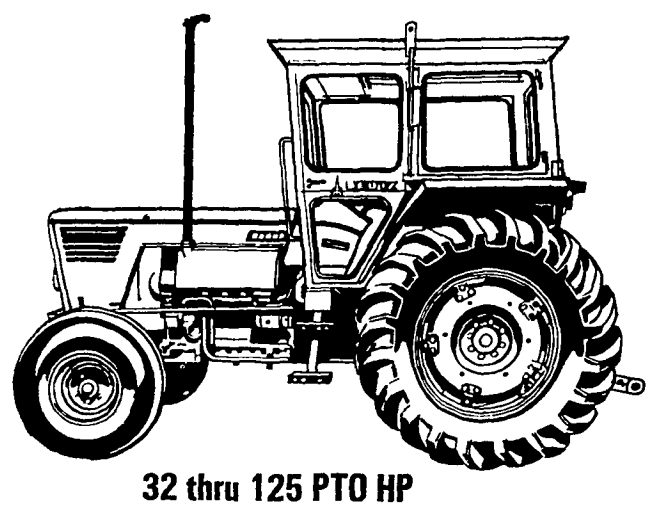
County loan and purchase rate schedules for 1972-crop soybeans are unchanged from those in effect for 1971, the U.S. Department of Agriculture announced. The rates for the counties are based on the national average loan level of $2.25 per bushel for 1972-crop soybeans as announced Oct. 18, 1971.

The premium and discount schedule is unchanged from that used in the 1971-crop program.

The national average loan level of $2.25 per bushel — unchanged from last year — is for soybeans containing 12.8 to 13 per cent moisture and grading not lower than No. 2 on the factors of test weight, splits, and heat damage, and No. 1 on all other factors. Support will be at the rates for the counties where soybeans are stored.

Copies of county rates will be sent to State Agricultural Stabilization and Conservation Service offices in States where soybeans are produced. Copies also may be obtained then from the Oilseeds and Special Crops Division, Agricultural Stabilization and Conservation Service, U.S Department of Agriculture, Washington, D.C 20250.

DEUTZ



32 thru 125 PTO HP

The Strong Green Line of Deutz tractors is available in 32-38-55-65-85-105-125 HP sizes. Air-cooled Deutz diesel engines have proven to be far more flexible than other diesels and last twice as long besides. Their constant torque pulls you through more tough spots without shifting.

Features on the big tractors include: Power steering, Hyd. brakes, Ind. PTO, shiftable 540-1000 PTO, choice of remote hydraulics, excellent draft control system, 16-speed fully synchronized transmission and a clutch that won't kill the operator.

Deutz now available with New Turbo-Charged power in the 130 06 Model Now on display at the "diesel people"

IF?

IF YOU WANTED TO BUILD A BETTER FEED WOULD YOU:

Buy 820 acres of ground to conduct research,
or
Contract with leading herds in the area,
or
Co-operate with universities and allied industires,
or
Test equipment and facilities,
or
Build your own feed mill to test manufacturing procedures,
or
Test suppliers products to find the best,
or
Employ computors to digest a host of information?

The team of Hales and Hunter Co. and Cargill Inc. does all of these and more to provide you with the best feeds available

Don't take our word though try a little research yourself,
try PIONEER

1972 National Holstein Junior Members Named

Two youth have been named as 1972 National Holstein Junior members.

Bruce L. Wilmeth, Grenola, Kansas has been selected from a field of 20 boys as the 1972 National Distinguished Junior Holstein boy. Bruce, 19, is the son of Mr. and Mrs. Ray D. Wilmeth Jr. His sister, Teryl, was a finalist in the girls division of this years contest.

Mary Kae Ossenkop, Vail, Iowa, has been named winner of the girls division. Mary, 19, is a daughter of Mr. and Mrs. Vernon Ossenkop. She topped a field of 22 girls entered in this years contest.

The Distinguished Junior Member program annually recognizes Junior Holstein members who have demonstrated strong participation in Holstein programs and other youth activities in preparation for their lifes work.

Boots and Saddles 4-H Club Hear Tips on Saddles

The May meeting of the Boots and Saddles 4-H Horse and Pony Club was held last Friday at the home of Robin, Daniel Jr, Jeff and Doug Fellenbaum, Fruitville Pike, Lancaster. There were 45 members and 10 parents present.

A $10 gift certificate from "Sheffer Western Supply" was awarded to Vicki Zipperlein for getting the largest amount of sponsors for the Club's Open Horse Show which was held April 23.

After the business meeting Dick McCoy showed the Club members how the western saddle should fit the horse and the type of saddle to buy for the horse with high or low withers. He also discussed the proper care of the saddle, the different types of saddles, including the roping and equitation saddles.

Following the meeting, refreshments were served by Mrs. Fellenbaum.

News Reporter
Daniel Fellenbaum Jr

Reason for Acceptance

SOS, the internationally accepted call for help from a ship in distress, was chosen because it was convenient to send on the early wireless transmitters.

* * *

Large Bird

At maturity the California condor weighs up to 20 pounds and has wingspan nearly 10 feet across. It is often termed the largest North American land bird.

The satisfaction that comes from doing a good job of farming

It's a great feeling to know that you are the master of your farmlands . . . that when you treat your soil right, it will treat you right. Liming is one of the most important factors in keeping your soil in the highest productive range. By raising the pH from a level below 6.0 to 6.5 or higher, you can expect to harvest as much as 5 more bushels of corn per acre, with similar increases for all other forage and cash crops.

Your sale can be listed in our Sales Register without charge. Just mail details to Lancaster Farming, P. O Box 266, Lititz, Pa. 17543

SUBSCRIBE NOW
We know many of our readers regularly read a friend's or relative's copy of our publication.

We don't mind. We appreciate all our readers.

But we wonder if everyone realizes how easy it is to receive our publication.

On a yearly subscription in Lancaster County, the cost is less than four cents a week. Only $2.00 per year.

On a two-year subscription in Lancaster County, it's less than three cents a week. Only $3.00 for two years.

Because mailing rates are higher for out-of-county subscriptions, we have to charge more. But out-of-county readers can get the paper delivered every week for a yearly subscriptions which costs less than six cents a week and a two year subscription for less than five cents a week. Only $3.00 for one year and $5.00 for two years.

Think about it.

In these times of high and rising costs, we're sure you can't find a better bargain anywhere.

Call us at 394-3047 or 626-2191. Or write to Lancaster Farming, P. O. Box 266, Lititz, Pa. 17543.

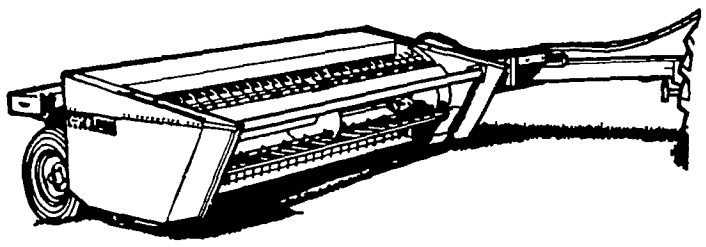
New Case 7-foot windrow-conditioner

treats hay like the big ones ...and then some!



The CASE 475 offers more. Like putting less hay in the windrow than a 9-foot — for faster drying-curing, especially the first cutting. It takes less horsepower, too — a 2 or 3 plow tractor does the job. And you have less overall width — just 9½ feet — for passing through narrow gates and lanes.

FARM FOR SALE

Look at this.
A Real Farming Opportunity.

154 acre farm, all tillable, good corn growing land. Land is gentle, rolling to level, within six miles of Somerset, Pa. Buildings on farm are 12,672 capacity cage layer house, barn 50x115 feet with silo, implement shed 30x60 ft., 2 story farm house, full basement, 1st. floor-kitchen, dining and living room area; 2nd floor-bath and four bedrooms, full attic, 7 year old coal furnace, Summer house, garage and basement. 1st floor-2rooms, 2nd floor-one room.

House trailer on foundation 12'x70', 3 bedrooms, bathroom, utility room, kitchen and living room, oil heat, automatic washer and dryer, dishwasher, electric stove and refrigerator.

Barn is being used to farrow pigs or would be a good steer barn. Layers are just coming into production.

This farm has a lot of possibility. Would sell complete with farming equipment, layers and sows or just the farm and contract the layers. Would help to arrange financing Might consider renting or employ someone to work.

Complete price for farm, equipment, house trailer, layers and sows $143,000. Available immediately.

Public Apology,

I wish to thank all the buyers we had on April 3, 1972, for the good support they gave us I am very sorry we could not sell everything in a one day period. I also wish to apologize to the people who would have liked tractors but could not wait. I promise to faithfully follow the time schedule on this sale bill. At 3:00 P.M. we will sell tractors regardless of our position in the field We will have the same good quality machinery, combines, and tractors for you to choose from. We are open for daily business and do promise to give you a good deal. Thank you all again very much and I am looking for your support on this coming sale. If you have any comments or suggestions please let me know. I want to have this sale for our customers, you come first

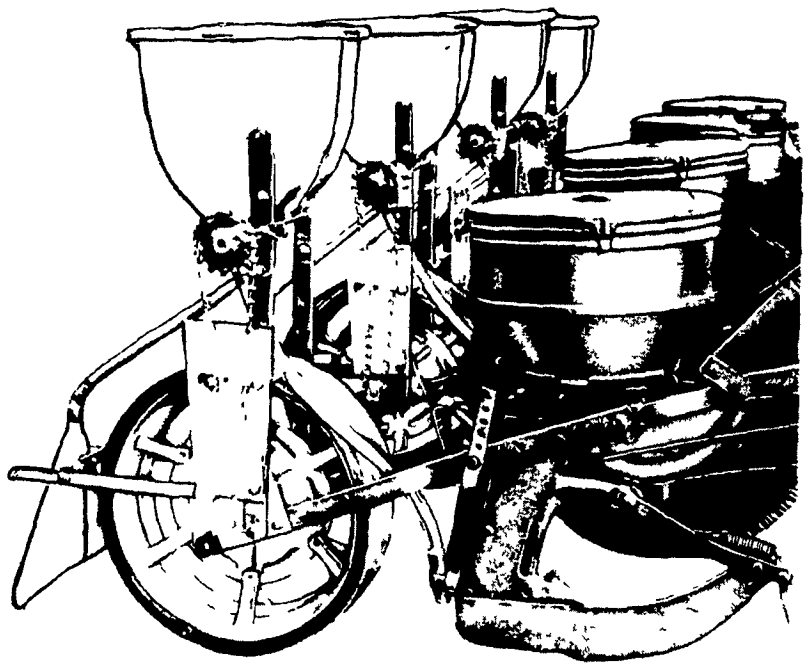
AGWAY

DYFONATE®

Controls Rootworm and Symphylan in Corn

- The only recommended product for control of symphylans.
- Plant early - Dyfonate still gets the late rootworm hatch.
- Control both resistant and non-resistant rootworms.
- Safe to use on all grain and silage corn.
- Higher rate also controls wireworm.



APPLY AT PLANTING TIME THROUGH A PLANTER-MOUNTED *EZEE FLOW* GRANULAR APPLICATOR.

DYFONATE Soil-Insecticide and *EZEE FLOW* Applicator

ARE AVAILABLE AT

YOUR LOCAL AGWAY OR ASK YOUR ENTERPRISE SALESMAN FOR MORE DETAILS.
